Danielle and Vicki:

Thank you for the opportunity to participate in the conference call yesterday. Adding the Aurora Historical Society and the City of Aurora's Landmark Commission to the creation and approval of the signage in the MOA is important to assuring that the history of district and railway are accurately recorded.

In addition, while I do not have the means to accurately reflect the 50 additional feet requested for the tracks, the addition takes the track to the edge of the wooded area on the station property. With the proposed addition to the station this addition will help to maintain the historical importance of the station area. Your attention to this request is greatly appreciated.

John Kudley
Director, Aurora Historical Society
