Transcript:

I'm calling to comment on the CN Acquisition of the EJ&E. I live maybe a half mile away from the tracks, the tracks do run north-south just east of us, this isn't a real good idea to increase the railroad traffic on that line considering that the hospital is on the east side of the tracks from us, well actually right now currently it's a medical center, eventually it will be a hospital as time progresses. Again, I do oppose, my family, we do oppose this acquisition of increasing the rail traffic on that from 16 trains per day to now 42 trains per day. That's going to create a lot of traffic headaches, it's going to create again, access to a medical center for a lot of people. This really isn't going to be a good idea for the community long term. I would hope that maybe CNN can look at acquiring a railroad track or a railroad company that would be farther west of us where its less populated. <repeated name and address> Again, we do oppose this. Thank you. Bye
