Transcript:

I'm a supporter of the C&A proposal. I believe the interests of millions of Chicagoans and individuals stand in the way is more important than incidental environmental issues or the issues of various political individuals that don't represent their communities and the people that would benefit from this. Again, I'm a supporter, I support this, I'm not an employee, I have no financial interest in these organizations, I'm only primarily interested in the benefits to individuals and the people of Chicago and the metropolitan area of Chicago. Thank you so much. Bye
