Submission Text

The far-reaching negative impacts related to burning fossil fuels are having global impact with Climate Crisis the direct result. Humanity must rapidly embrace sustainable energy sources for our needs. If there is to be a livable future it will be one in which fossil fuels are left where they belong: in the ground. Attempting to push through with coal development on sacred Native lands would be an egregious act against people who wish to continue their lives free of such destruction. I stand with them. I stand against the construction of the proposed rail-line and/or any other structures that would lead to the further transport of coal or other fossil fuels. Thank you for your time and consideration.
