Dear Mr. Navecky:

I am a lifelong resident and land owner of property located in Grant Park, IL Sumner Township, and write in opposition of the proposed Great Lakes Basin Railroad. This proposed rail yard will destroy approximately 16,000 acres of productive farm land, the natural resources associated with this land, disrupt wild life, cause erosion, drainage, pollution and have various other negative effects. Additionally, this rail yard will negatively impact the county by reducing farm economic output and cause the loss of jobs. Kankakee County depends on agricultural and this rail yard will do nothing to support our economy. This county has a population of approximately 130,000 residents and we stand ready to oppose the location and construction of this rail yard. I urge you to consider alternative locations. Thank you for your understanding.
