Transcript:

Please reject the proposed acquisition before its too late. American citizens are living with economic mortgage crisis right now because elected officials turned their heads until it was too late. Please do the right thing and reject the proposed acquisition, and help main street America, what our country is built on. The negative impacts are obvious, but we should especially focus on concerns with emergency vehicles, school buses, and of course our everyday commuters. The impact studies does not include the accurate number of trains. Phase II of CN Rubert Sound Container Terminal will increse the impact study number of 25 trains one way by 4 times. CN plans to build a second track along the EJ&E track and will have the capicity in 2010 for over 100 trains per day. Please do the right thing and reject this.
