395 E Street SW
WASHINGTON, DC 20423-0001

ATTN: Dave Newecky:

I moved here in 1960 -
ALSO farmed the land. We
fought water problems all
that time

Lima Center Rd - Go to
KK RAIL crossing - just repaired
The track sway & wobble
because it is on Lima
MARSH LAND.

ALL fields ARE tiled &
ditches ARE USUALLY full.
If you did in these you
wreck ALL the work for
years to make this workable
Town Line Rd - you CAN SEE
water running in 2 places in
the field from 2 springs
on the top of the hill -
This is right where the
RAIL is suppose to go over

picture #1

- #1 Six Corners Rd - more springs
drain to large pond on North
side of rd. (Always there) -
drains under rd - to south side
#2 of Road - then under Co Trk
#3 Rd m into & down through
#4 ~~field~~ ~~the~~ field to N. TARRANT
Road puddles in field under
#5 TARRANT Rd to stopping
#6 place - on my farm -
#7 large pond ALSO.

Laying down track &
digging in fields would
UNDO ALL the CONSERVATION
plans - work & expense
we have done.

We don't want to be
Another Chicago full of
Tracks & lack of land

It is time to think of
the future - We can't make
more top of the line land.
And we sure don't NEED
more abandoned rails

JUNE 9-2016

DAVE NAUCKY
Surface TRANSPORTATION BOARD
Docket #FD 35952
395 E STREET SW
WASHINGTON, DC 20423-0001

ATTN: DAVE NAUCKY

Our water is very important
to us. We practice a conservation
plan to keep it safe & clean.

We get a lot of heavy
spring rains & snow melt,
that flood the fields.

Our soil has limestone
down under the soil, under
which we have natural
water flow.

If they start, digging
in this to lay tracks - It
will flood our farms - open
springs & change water flow

About 6 to 10 yrs ago -
they wanted to put a
Power Plant in our area.

They discovered our
water problems. So they over

went to Rockdale, WI.

I have included pictures of the problems with water in AREAS I TALKED ABOUT.

They (the power plant) discovered the limerock & water ~~under~~ under it & the springs in ALL THE AREA - even further EAST.

Thank You

Judith Fleming

4933 N. TARRANT RD
MILTON, WI - 53563

P.S. THERE is a House on County Trunk A. Built in the mid 1800's. There furnace is on a high platform. When they built the house they opened a spring in the basement.

It has run all these years & is pumped out with 2 large ~~pumps~~ pumps.

They pump it out & there is A LARGE stream of water flowing through there

Docket # FD 35952

This picture is
connected to the
pond on Six Corners
Rd on the North
on VICKERMAN Rd

This is the pond
ON Six Corners
Rd North Side

11

cket # FD 35952

2

This is the holding
pond on South side
of Six Corners Rd.

Usually Bigger than
This

#3

This is under
County Road m
from pond on
South side of
Six Corners Rd

Docket # FD 35952

#4

This is the field
that drains ~~from~~
from Six Corner
South side of pond

Docket # 35952

#5 Docket# FD 35952

This is my property
That run under
the road- from the
field This is on
North TARRANT Rd.
Milton, W.
Another big culvert
under Road

#6

SAME picture of
water AS Last one—

But shows Large
Conduit

Docket # 35952

#7

Docket # FD 35952

This pond is on my
farm - is ALWAYS there
AS is all the water
in Spring when springs
ARE draining & heavy
RAINS or snow melt

#8

Docket # FD
35952

This is water
spill in field
further down when
water is running

#9 Docket # FD

35952

This is ALSO water
spill in field when
water is running
