 To: "Surface Transportation Board Chairman Daniel R. Elliott III, Vice Chairman Ann D. Begeman, Commissioner Francis P. Mulvey" <STBHelp@stb.dot.gov>
 Date: 09/17/2013 02:50 AM
 Subject: 4,385 signers: Protect the Cheyenne Ancestral Homeland petition

Dear Surface Transportation Board Chairman Daniel R. Elliott III, Vice Chairman Ann D. Begeman, Commissioner Francis P. Mulvey,

I started a petition to you titled [Protect the Cheyenne Ancestral Homeland](#) . So far, the petition has 4,385 total signers.

You can post a response for us to pass along to all petition signers by clicking here:

http://petitions.moveon.org/target_talkback.html?tt=tt-47305-custom-25003-20130930-JBJzen

The petition states:

"Arch Coal wishes to put in a Tongue River railroad for a new Otter Creek coal mine in the Cheyenne ancestral homeland. The mine and railroad are opposed by the Cheyenne people. This does not serve the public's interest, as is required by the Surface Transportation Board in order for this coal strip mine and railroad to be built. There is no clear market for this coal, and it is wrong to destroy a people's land. We ask you to stand up and protect the Northern Cheyenne ancestral homelands. Please show your opposition to the Otter Creek mine by opposing the development of the Tongue River railroad. The Otter Creek area has been historically used by Native American tribes, including the Northern Cheyenne and Crow. The coal from this one proposed strip mine would release 2.5 billion tons of carbon dioxide—making it one of the biggest new sources globally—which would worsen the effects of climate change."

To download a PDF file of all your constituents who have signed the petition, including their addresses, click this link:

http://petitions.moveon.org/deliver_pdf.html?job_id=981099&target_type=custom&target_id=25003

Thank you.

--Winona LaDuke -- Honor the Earth

If you have any other questions, please email petitions@moveon.org .

The links to download the petition as a PDF and to respond to all of your constituents will remain available for the next 14 days.

This email was sent through MoveOn's petition website, a free service that allows anyone to set up their own online petition and share it with friends. MoveOn does not endorse the contents of petitions posted on our public petition website. If you don't want to receive further emails updating you on how many people have signed this petition, click here:

http://petitions.moveon.org/delivery_unsub.html?e=XI.5a1Ury4XyH0GTgWF1O1NUQkhlbHBAc3RiLmRvdC5nb3Y-&petition_id=47305 .

Dear Surface Transportation Board Chairman Daniel R. Elliott III, Vice Chairman Ann D. Begeman,
Commissioner Francis P. Mulvey,

We are pleased to present you with this petition affirming this statement:

"Arch Coal wishes to put in a Tongue River railroad for a new Otter Creek coal mine in the Cheyenne ancestral homeland. The mine and railroad are opposed by the Cheyenne people. This does not serve the public's interest, as is required by the Surface Transportation Board in order for this coal strip mine and railroad to be built. There is no clear market for this coal, and it is wrong to destroy a people's land.

We ask you to stand up and protect the Northern Cheyenne ancestral homelands. Please show your opposition to the Otter Creek mine by opposing the development of the Tongue River railroad. The Otter Creek area has been historically used by Native American tribes, including the Northern Cheyenne and Crow. The coal from this one proposed strip mine would release 2.5 billion tons of carbon dioxide—making it one of the biggest new sources globally—which would worsen the effects of climate change."

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,
Winona LaDuke -- Honor the Earth

Danielle McPherson
Minneapolis, MN 55409

Aug 25, 2013

This is shameful to try and put development through a Native homeland. These people have been through enough in the past 400 years, we should be trying to help them and their heritage, not destroy the land we stole and then gave back to them.

Very important to be respectful of our Native peoples' lands... the minimal space they now hold onto from the desolation our country made of the wide-open spaces they were willing to share with immigrant pioneers during the 18th and 19th centuries. PLEASE, do the RIGHT THING, DO NOT use the Cheyenne ancestral homeland for railroad unless you get full approval from the Cheyenne Nation after being fully transparent with them.

we in the United States have a big problem. It stems from the people that have taken over the government not only in this country but all over the world. I wish luck and success in your endeavors but it may be too late because Americans have been lulled to sleep by the new technology. The Media and banks and companies are controlled by a force that you would have to research for yourself.

Governor Dayton said no to fracking in MN. He needs to say no to this strip mining also. We have a beautiful state with lots of nature, that needs to be protected. You have seen the results, and devastation, of strip mining from around the world. DO NOT ALLOW MINNESOTA TO BECOME SOMETHING OTHER THEN WHAT WE ARE KNOWN AS "GOD'S COUNTRY"

Sholla Blasing

Hello to all who may read this. There are some things so obviously wrong with the world market place for buying and selling valuable land and priceless resources, we should all stand against further destruction of our mother, planet earth. I love my own dear mother incredibly and she'll soon be seventy. Please don't impose on the Cheyenne people. It's in everyone's best interest, the world around. Spread good karma instead and relieve our mother planet in as many ways as and as soon as possible. Honestly, please, and thank you for reading. Sincerely, James Christopher Buckvold (Addict and Alcoholic sober by choices since I woke up September 15th, 2009 and I love to meet newcomers and continue to work many programs ...for peace. Thank you again)

James Buckvold

This Land Is Our Land! It does not belong to greedy corporations who abuse it and leave it in ruins--running away with all their immoral profits! This land belongs to the Cheyenne people, who have lived there and loved and respected the land for many centuries! This mine and railroad will not serve the public interest and must be denied.

We cannot continue to rob the earth of its ancient materials and expect there to be no serious consequences. My father was a coal miner for 40 years and died of black lung disease. There are other ways to make money and other ways to make a living. There is nothing good about the production of coal, and using it is basically a human death wish.

Unfortunately there is a clear market for Coal, we are all to blame - but it is wrong not to find alternative sources of power. Coal is BIG Business, it's horrible what it does to our environment and the people who live where they mine it. If Americans truly understood the issue it would be over. Thank you for your efforts on behalf of the Cheyenne!

Stop the destruction of our land, and the disregard of the Cheyenne people's ancestral homeland. Enough is enough. When will we, as a country stop the exploitation of lands that we have time and again, broken promises? As members of the STB, your decision can be positive for our future needs. Siding with Arch Coal, or any coal company negates any federal policies to reduce carbon emissions. You have a responsibility to act in an honorable manner. Thank you,

All this nonsense so we can ship coal to China where it will be burned with even fewer restrictions than we have so it can come floating back in our rain. Meanwhile, coal dust all the way from Montana to the shipping ports will degrade land, air and water. Clearly a bad idea and I'm proud to stand with the Cheyenne.

STOP THE OTTER CREEK COAL MINE!!! No one in America needs suffer any more pollution from outdated energy sources when it is clear the wind can produce energy cleanly. I just had the privilege and horror of watching a documentary that featured the good people of West Virginia and Robert Kennedy Jr. who has called for the mountain top mining of West Virginia to be halted. Countless people in West Virginia have suffered and the mountain tops are being blown off and destroyed forever for our lust for cheap, dirty energy. Not to mention the sacred lands that belong to the Cheyenne and Crow tribes that will be desecrated. This is morally wrong!! We must stand for those whose lands are being taken for ill purposes that are not needed. Whether it be the people of West Virginia or the Cheyenne and Crow of the Tongue River and Otter Creek areas. If the raping and pillaging of our land is to be halted, we must all stand firm and protect one another from permanent harm. Water, air, land, these things cannot be returned to us unharmed after the damage is done. In order to survive as a people we must protect the land we turn to, to sustain us. Please stop this madness before it is too late.

We continually apologize to the Native Americans for travesties and tragedies of the past without learning anything from them. And so we repeat them as with this railroad project. Does America NEED to violate a people's homeland in order to fill our greedy desires? If so, we need to do some serious soul searching, for we are not who we think we are. Nor are we the great people we have the potential to be. Very sad.

Look at what man has done to Mother Earth since the industrial revolution in the mid 1800's....essentially the beginning of Corporate America. Mankind has been here for over 100,000 years and look at what Corporate America has done to our planet in less than 200 years. We need to be more responsible to Planet Earth. Also...how many more times are we going to screw over the Indians. The reality is....the white man is the savage....and I am not an Indian.

We need to recognize global warming's effect on the earth by getting off our dependence on fossil fuels. We need to take better care of the earth. Nothing new to the Cheyenne people, but to entrepreneurs of the US is seems to be unimportant (until it is too late).

My! The 1880's version of manifest destiny is still alive and well today! Arch Coal would never consider desecrating white ancestral homelands such as national or state parks! Why should they be allowed to run rough shod over a piece of land that is also a piece of our collective American history? Greed and a total disregard for anyone or anything that doesn't line their pockets? Hasn't anyone told them that environmentally clean fuels are the future? Once the damage is done, it cannot be undone. If this proposal cannot be shown to be in the public's interest as is required, Arch Coal should not be allowed to proceed.

The government of this country has treated the Native American people for far too long. We owe them a blood debt that is next to impossible to repay. Do NOT heap even more disrespect upon these people. Quit now, before the Native Americans have only one retribution left. LEAVE THEIR SACRED LANDS ALONE BEFORE KARMA BECOMES TOO EXPENSIVE TO PAY!!!!

There is a reason why God placed his most precious gifts in the earth and entrusted his most committed people to care for the earth. As a native of the Cheyenne Tribe I know how important it is to preserve our land and what it means to the future for all. Please do not destroy any Cheyenne Ancestral Homeland. It is an important link to our generation. Thank you!

Aug 15, 2013

Someone who could support an action such as this, can make no claim to support the interests of public good and civil justice; nor can they claim to truly support private ownership. It is the civic duty of industry is to help to ensure the economic stability of an area through an influx of new and expanded labor and commerce, while respecting the livelihoods, persons, and effects of the other peoples and industries within their area of business and without. It is for their adherence to such civic responsibilities that we give such industries exemption to certain laws or special treatment under the law. Yet, if they cannot adhere to their civic duties we more often than not, fall flat on our civic duty to expel them from our communities. All industry, by it's very nature can be disruptive. If the disruptive nature of a particular business or industry outweighs its benefit to the community, it has no business remaining within that community. Unwanted industry is exponentially disruptive to a community. It disturbs the piece, drives away residents, and leads to general discourse with in the existing populations of an area. There is no room for such disruptiveness within our communities. The right of another ends at the point when that right infringes upon the rights of others or in general, does harm to another.

Why are you clinging to old outmoded dirty fuel sources like coal? As consumer demand for clean renewable energy continues to grow, only companies that shift their focus to wind, solar, and micro-hydro will be able to stay in business.

Real estate folks say Location location location. The valuation of routes should include income stream of taxes by local, state, and federal governments, as well as the "prime location" of a preferred route. The constitution prohibits government seizure without compensation or fair compensation, and this land is described as sacred, much more valuable than even a "prime location" even if enhanced by valuation of the future tax revenues streams.

After all we know now about the horrors of how Indians were treated since the so called "civilized people" arrived, and for all the environmentalists this un-needed, profited oriented defilement of the earth is just the kind of treatment we want to extricate ourselves from. It is a dark, unforgiveable act given what we know of our past - we cannot with the knowledge we have go along with this travesty and not suffer the consequences.

I oppose the Otter Creek Coal Mine on several grounds. This mine is a poor choice environmentally that will have detrimental effects on the natural environment in and around the area of the site. The mining process also will result in a substantial impact in carbon released into the atmosphere at a time when a national agenda of divestment should be taking place. Second only this mine is opposed by First Nation peoples and will desecrate ancestral land of the Cheyenne People. Our Nation has a poor record of living up to our Promises and Treaties to First Nation People and thus should not allow corporate interests and profits to continue a policy of colonialism that began hundreds of years ago that has been responsible for the destruction of an entire cultures.

Why would we want to encourage coal mining knowing how detrimental burning coal is to our health? There is no such thing as "clean" coal. And to destroy sacred sites in ancestral homelands in unconscionable.

I live in Minnesota, I believe this state is a beautiful part of the US and we have a responsibility to lead the way in keeping sacred lands just that, sacred.

Jenny Hedin
St. Paul, MN 55106
Aug 15, 2013

As a USAF Veteran I am sworn to uphold the Rights of ALL of our citizens and to protect this great country from harm. Building a new railroad to service a new strip mine is unconscionable to begin with -- both are well-known environmental polluters -- and to disrespect sacred land is even worse. There is no viable argument for putting greed and profit over the welfare of human beings and protecting the environment we all live in. Further damaging our world for a maybe someday potential profit? Not on my watch! Stop this madness!

Anyone who could consider damaging sacred Ancestral homelands of the Cheyenne must have the heart and brains of a slug! Have we not done enough to them? We killed as many as we could, men, women and children. Then we passed laws and "gave them safe land to live on". Well, actually, it was probably the worst land available...no white man would try to build a barn and raise cattle or corn on such arid, hot, useless land. Then we found out that we could get their beautiful handmade jewelry for a nickel and sell it for a dollar...and better yet, we could pay them in alcohol. And that's a big part of the Indian history. They are still drinking our alcohol because we helped them to become addicted! Enough! Treat them honestly and humanly..give them their fair share.. stop trying to rob what little they have. Shame on all of us.

Florence Wagner
Lopez Island, WA 98261-0312

This is both a violation of the rights of people and a blight environmentally. No more coal. There is already way more coal than can be burned without irreversible effects on the climate. AND let us not add any more damage to the horrors that have been inflicted on native peoples. All those who sign this petition stand behind and along side the Northern Cheyenne tribal members in opposing this mine. Corporate greed in the name of capitalism doesn't trump democracy or what is morally right.

Moving this coal will benefit only the Big Coal tycoons, while inflicting damage on communities and wildlife all along the route to the West Coast, on the marine resources which will suffer several hundred more passages by huge cargo carriers through their waters, and especially on the entire planet when the coal is burned in Asia, heating the planet and dispersing pollutants around the world. PLEASE think of the future!!!

how beautiful is the name "otter Creek ", and how ugly "arch coal". This is Cheyenne homeland. The Cheyenne do not wish for the coal mine and railroad to be built and destroy their land. Please respect their wishes, on behalf of the whole of the Natural world and people everywhere who do not wish to see more carbon dioxide adding to an already existing problem. I hate to see more disrespect to Native American people.

There are several executive orders, presidential memorandums and federal laws, including Section 106 of the National Historic Preservation Act and the mandates set forward in the White Council on Native American Affairs, particularly Section 1"(e) protecting tribal lands, environments, and natural resources, and promoting respect for tribal cultures" that require you, as an agency of the federal government, to give priority consideration of Tribal rights in their need to protect their sacred lands and ensure their cultural continuity. Tribes within the area of the proposed Otter Creek Coal Mine and the Tongue River Coal railway projects have voiced their objections and opposition to these projects for valid and substantial reasons, stating in the EIS process and elsewhere the adverse impacts these projects would have on their lifeways. Enough damage has been inflicted on this Nation's indigenous peoples and it's up to you to ensure no further damage occurs. For the sake of the Indian Nations as well as the sake of all the rest of us, you must deny the requested permits.

I oppose dirty energy, and strongly support the Cheyenne and other Indigenous peoples in the regions who would be affected by the proposed Otter Creek Coal mine and Tongue River railroad. The Cheyenne peoples oppose these so-called developments on their ancestral and rightful homeland. The sovereign rights and environmental/human rights of Indigenous peoples to their land, their public health, and to the longterm environmental security of their necessary natural resources (like uncontaminated water, land, and air quality) must be fully respected. Please do everything in your power to oppose the proposed Otter Creek Coal mine and Tongue River railroad.

I live and teach on the Northern Cheyenne Reservation. My husband, four children and three grandchildren are all Northern Cheyenne tribal members. The land here is rich and unique and the people hunt and fish here for sustenance. To the Cheyenne, this land, water and air is sacred, and their ancestors fought and deeply sacrificed in the journey from Oklahoma Indian Territory and the breakout at Fort Robinson January 9, 1879. These truly are ancestral homelands and I implore you put a stop to this plan to build a railroad and start a mine. There is no need to remove this coal. Besides, the Earth is now at 392 ppm of CO2 in the atmosphere, and scientists concur that we cannot sustain more than 350 ppm. Thank you.

All fossil fuel exploitation must cease! We need a healthy planet to live on. Natural resources are almost always more valuable than mineral exploitation.
