What comments do you have about the Draft Environmental Impact Statement?

"The wave of information threatens to obscure strategy, to drown in details and numbers, calculation and analysis, reaction and tactics. To have strong tactics we must have strong strategy on one side and accurate calculation on the other. Both require seeing into the future." GARY KASPAROV, How life imitates chess.

"Opposite pairs working in harmony: this has become a theme of our quest to perfect decision-making. Calculation and Evaluation, patience and opportunism, intuition and analysis, style and objectivity... Strategy and tactics, planning and reaction. Success comes from balancing these forces and harnessing their inherent power." GARY KASPAROV, How life imitates chess. Taken from The Fire, Katherine Neville
