Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

As a new community member in the past two months, I have begun to second guess my move due to the CN issue. More railroads will impact safety for all community members due to more congested roads therefore impacting rescue of fire + police officers as well as ambulance calls. More trains will drastically impact travel times, as well as gas mileage and economic costs to citizens. What has been a quiet community, will now be a noisy and stressful place to live. Businesses will be impacted as well as the opportunity to create new businesses. Businesses will not want to set up house in a community that is congested, noisy, and not accessible. Barrington and neighboring towns are not set up to handle this type of high traffic.

Do what you say and work for the people and keep our community safe!
