I am writing you to tell you how against I am of the CN railroad acquisition of the EJ&E. The American taxpayers should not be forced to pay for their millions of dollars of grade separation infrastructures that will enable this foreign corporation that already makes 2 billion in annual profits to come in thru many suburban towns. I live in Barrington and traffic is already terribly backed up and this situation would make the downtown area paralyzed with this congestion. This CN railroad would pass next to my high school. I went and read accident reports regarding the CN railroads and it was very scary with the also carrying hazardous materials. Please fight this . Thank you and please don't let this pass.
