Submission Text

Hello - The Tongue River Railroad is a proposed pathway to destruction, an 83-mile long rail line devoted exclusively to making it easier to dig up and burn coal. This railroad would link up two of America's biggest coal mines to ports that would allow millions of tons of coal to be shipped and burned overseas. The science is clear: keeping our current climate promises means keeping at least 80% of fossil fuels underground. That means this railroad is at best an economic boondoggle, and at worst a fast-track to climate disaster. Attached please find 1000 comments from 350.org supporters in Montana, Wyoming and Colorado opposing this boondoggle of a project. Regards, Duncan Meisel

				The Tongue River Railroad would be the wrong railroad in the wrong place for wrong reasons -- please stop this from happening in the first place.
				All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Andrew	Carson	Wilson	WY	Thanks for giving us an opportunity to share our thoughts. America was once a leader in the world of innovative thinking and democracy. I would hope we would not continue to blatantly disregard obvious alternatives, especially with regards to those currently experiencing the worst effects of climate change not limited to death, war, and forced migration.
Devin	Buercklin	Colorado Spr	CO	As a U.S. citizen and long-time resident of Montana, I am writing today to strongly oppose the Tongue River Railroad project for multiple reasons.
				Dramatically increased coal train traffic, in which this project will result, is the last thing Montana needs. Such traffic is a threat to public health (pollution in numerous forms) and public safety (delays/roadblocks at RR crossings) all along the route.
				Moreover, the Tongue River Railroad will be a fast track to further and future climate destabilization. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Richard	Wachs	Missoula	MT	Thank you sincerely for your attention to this matter.

Carolyn	Hidy	Trout Creek	MT	DearPresident Obama, Because you are a very intelligent man, I know you can appreciate this quote from F.Scott Fitzgerald: "The test of a first-rate intelligence is the ability to hold two opposing ideas in mind at the same time and still retain the ability to function." As a Montanan, fully acknowledge that coal pays for much of our state -schools, roads,jobs, etc. On the other hand, you and I both know that burning coal produces CO2 with which we are warming our atmosphere to the oint of potentially eliminating life on earth as we know it. Neither permitting nor denying the development of the Tongue River Railroad and Otter Creek Coal mine is an easy decision, because of the potential for loss of jobs versus loss of EARTH. But we MUST face facts NOW - in order to have even a CHANCE to turn around the climate change disaster upon us, we MUST leave almost all the rest of the world's fossil fuels in the ground. There's no wiggle room left on this. would be a fast track to climate destruction. For this r Do not allow the Tongue River Railroad.
				It is time that the government and companies begin to invest in clean energy jobs. It is not time to ship more coal for bigger polluters to burn.
Brian	Checksfield	Denver	CO	Brian
James	Stone	Aspen	CO	Do we want to take strong action to minimize the damage of climate change? Do we want to sometimes do that and in other cases allow the extractive industries to foul the land and air in order to use those fossil fuels for cheap energy even though the consequences would jeopardize peoples' health and damage or destroy unique ecosystems? Shouldn't we have consistency? Shouldn't we keep fossil fuels in the ground? President Obama, are you a leader in the movement towards protecting the environment? Or not? Where is the will, the determination to leave the world liveable for the future, for our children, for our grandchildren? The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
				Don't Let Greed Destroy Our Nation! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Thomas	Stocker	Arvada	CO	

Have you ever heard John Prine's song about Mr. Peabody's coal mine and how it took everything away?Coal should be kept fossilized, in the ground, buried, unburnt.

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Help Save Our Lands! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

I am just sick of watching the federal government pretend to be concerned about addressing climate change while simultaneously moving forward with wrongheaded projects like this one. We don't need more rail to transport more coal. We need to stop burning the damn coal. Shut this misguided project down.

I have written many times that your "all of the above" strategy is a disaster for the climate. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

I oppose building the Tongue River Railroad. This area is dear to my heart and I would not like to see it developed. I also do not want to build infrastructure that supports additional coal extraction and all the pollution and environmental destruction that come with it. The railroad should be rejected.

I'm looking forward to the day when I can submit a comment in *favor* of a project that supports renewable energy! instead of yet *anothwr* project aimed at supporting fossil fuels & dirty energy. If A Erica is truly going to become a world leader in climate change policy, then we need to start by stopping ridiculous projects like this: antiquidated, expensive & essentially a subsidy for the coal industry. Why are my tax dollars being used for something that is already obsolete? Ridiculous.

Leave the carbon in the ground, not in the atmosphere.

Lets focus energy and expense on renewable energy. The Tongue River Railroad would be an investment in coal energy which--as a leading nation--we should be moving away from and finding cleaner, more sustainable sources.

The time is now!!!!

Mr. President,

This is not only a despicable environmental menace, but a wrongheaded business decision--an investment in a dying technology that demands a swift and minimally painful demise.

Stand with the Pope.

Take the earth into account.

All the best,

Chris Hassig Carbondale CO

Chris
No more COAL and non-renewables development please!

Janet Draper Lakewood CO

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Ron Garrison Denver CO

NO NEW COAL! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Please help America be the environmental leader. This Tongue River Railroad hasten climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Edward Pope

Edward Pope Silverton CO

Professor Emeritus, UW-Madison; Vietnam veteran; former Peace Corps Volunteer
Please live your rhetoric on the climate crisis. One more piece of infrastructure that facilitates increased fossil extraction and burning is a calamity.

RJ Harrington Louisville CO

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
President Obama,

Please let's move towards the future with renewables and investment in the technologies to improve our lives and clean up the environment. Let's not inflict additional harm to the environment in the short and long term by allowing the Tongue River Railroad to be built.

Thank you,

Neal Sullivan

Neal Sullivan Littleton CO

STOP the Tongue River Railroad! If we want to leave a better world for the coming generations and avoid the disastrous effects of climate change, we need to keep the coal it would carry UNDERGROUND.

Natalie Freeman Boulder CO

Integrity! Let's keep our promises!

The damage to the environment is being done as we speak. It has no brakes, but if we act now we can slow its momentum . It does not make sense to destroy our lands and environment for the profits of a few companies . This a recipe for disaster. Why should American Citizens bear the brunt of the health and environmental consequences for large companies' profits?

Lynn Benjamin	Welch Sargent	Monument	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. The Tongue River Railroad and all other coal projects are crimes against humanity and should be shut down. The Tongue River Railroad is a crazy idea if we are serious about combating climate change. More coal is NOT the answer to our current energy needs. We need the coal to stay underground as a carbon sink forever.
		Aurora	CO	
Ann	Cooper	Boulder	CO	
Yellowbeard		Ashland	MT	
Tom	Daggett	Denver	CO	The Tongue River Railroad is not only a fast track to perpetuate climate disaster, but also a fast track to ecological destruction of the Otter Creek and Tongue River Valleys. An area so rich in culture to American history; historical, archaeology, battle sites and other TCPs exist throughout this region, which should be off limits to coal development and development of the Tongue River Railroad. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. The Tongue River Railroad proposal should be rejected. Our government should not allow public lands and assets to be used in a way that facilitates burning US coal overseas. This railroad would at best be useless, and at worst a climate disaster. All of the coal it would carry should be left underground if we are going to avoid catastrophic climate change. Please reject this proposal.

The Tongue River Railroad proposes to do the unthinkable: use eminent domain laws to strip private property from individuals for the benefit of a private company whose primary profits will come at the expense of not only the local population but the citizens of the world. Our economy needs to be based on future-proof renewable energy, rather than on outdated industries such as selling fossil fuels overseas, which will soon be relegated to the dustbin of history. Furthermore, as citizens of the planet, we cannot afford to encourage the burning of fossil fuels any further; our climate is already changing, and even if carbon emissions stopped entirely TODAY, the climate would get worse before it gets better.

The Tongue River Railroad is at best useless, and at worst a climate disaster, and should be rejected. The Tongue River Railroad should not be approved and built. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. As a climate scientist, I'm all too aware of the dangers posed by continued coal development. The Tongue River Railroad must be rejected. The Tongue River Railroad would be a fast track to climate destruction.

There must be a way to build this type of insane project exclusively over districts that are inhabited by the zombies who keep electing inept politicians in the state and congressional houses.

So I know you can't fight the coal industry since they're so dirty in so many ways, but at least avoid insulting further a native population that is so downtrodden. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change and unnecessary destruction of land. It's at best useless, and at worst a climate disaster, and should be rejected if we are to consider ourselves world leaders and innovators. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change.

It's at best useless, and at worst a climate disaster, and it should be rejected.

Toni	Ward	Durango	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It should be rejected. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst (and quite certainly) a climate disaster, and should be rejected. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Janet	Allison	Missoula	MT	
Mr. President, you cannot pretend to fight Climate Change and allow projects like this and permit drilling in the Arctic. Our very home is at stake. Please show some leadership.				
Janet	Wise	Aurora	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Katherine	Gulliver	Denver	CO	Also, the plan for the coal dealers involved is not to use the railroad to provide coal for American consumers, but to deliver it to ports to ship overseas! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Virginia	Schultz	Gold Hill, CO	CO	Build trains for moving people. Be brave and say NO! to the Tongue River RR. Honor those who are protecting the land, air and all beings!

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Virginia	Schultz	Boulder	CO	Build trains for moving people. Be brave and say NO! to the Tongue River RR. Honor those who are protecting the land, air and all beings! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
----------	---------	---------	----	--

Susan	Williams	Denver	CO	Coal is dead already. People still have a fighting chance. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
-------	----------	--------	----	---

Evi	Klett	Denver	CO	For the sake of our children and their ability to become adults in a healthy biosphere please reject this rail line. The science is in 80% of fossil fuels need to stay in the ground. Don't enable them to be taken out and burned either here or abroad! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
-----	-------	--------	----	---

Gloria	Flora	Colville	WA	Furthermore, the recent set of findings and recommendations from the Advisory Council on Historic Preservation regarding proposed fossil fuel development on the Rocky Mountain Front in Montana clearly show that this kind of development is wholly incompatible with protecting the historical and cultural significance of the area to residents and the Northern Cheyenne Tribe.
--------	-------	----------	----	--

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Gregory	Haas	Buffalo	WY	However, there should be a passenger rail line from Denver, CO to Billings, MT. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
---------	------	---------	----	--

Jahnavi	Stenflo	Boulder	CO	I am OUTRAGED that these proposals which are just BAD IDEAS are even up for consideration! REJECT this outrageously BAD IDEA NOW!!! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
---------	---------	---------	----	--

Donald	Sawyer	Canon City	CO	If we continue to show such disregard for the environment we will become the first species to cause its own extinction. There is no reason these fossil fuel companies can't join the transition to renewable energy instead of fighting the inevitable.
--------	--------	------------	----	---

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

President Obama, you have shown great leadership on climate change issues. The world needs a break from more fossil fuels. Please approve other energy projects--the renewable kind!

Julie	Buck	Denver	CO	Thank you from my family, especially my two children (Josh, age 13 and Ashley, age 11). They are the inheritors of our climate mess. The Buck Family, Denver, Colorado
				The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

The coal is coming from public lands and they have no right to the oney gained. This coal belongs in the ground.

President Obama you say you are for the environment. Allowing this to go forward says you are not. We need no more coal.

				Thank you
Cheryl	Kindschy	Helena	MT	

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

The project is going to cut off the surrounding neighbors. It is going to pollute MT, ID, and WA and poison the people along the way. It is going to slow down emergency response in hundreds of towns. The coal will come back again in the form of air pollution on the wind currents. It will acidify the oceans, and negatively impact our food supply and the creatures of the sea. It will heavily contribute to climate change. It is a horrendously bad idea all around. Profit a few, at the expense of many! and, if we are serious about reducing healthcare costs, we need to quit poisoning our people and our planet!

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

The time for burning coal is over. Realize this now and stop this project!

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

The Tongue River Railroad also violates our obligations to uphold the sovereignty of Native American nations within our borders. The Northern Cheyenne Tribal Council voted unanimously against the Tongue River Railroad because it would adversely affect their land, health, and cultural identity.

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

This is a giant step backwards. Please work on approving an energy policy that will move us forward and away from climate change.

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Billy	Angus	Hamilton	MT	I will not allow this Earth to be turned into a polluted dystopian wasteland and as a wizard, I will use my cosmic powers to stop this destructive project at all costs!! The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Marcia	Chuvarsky	Denver	CO	Dear Mr. President, Calif. and Wash. state have made a graphic point about global warming. Fossil fuels must be eliminated from our "energy diet" if we are to save our beautiful planet from even greater disaster. Please reject the Tongue River Railroad! Marcia Chuvarsky The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Edd	Blackler	Bigfork	MT	It is hypocritical for the United States to campaign for a cleaner environment on one hand, and to support projects such as the Tongue River Railroad on the other. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Judith	Niemann	Arvada	CO	It is time to try to stop our contamination of air and water. Climate change is obviously having catastrophic effects already and we must do what we can to lessen its impact. We have no control over China etc. but we do have control over what WE do. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Laurel	Pace	Aspen	CO	Stop the insanity!

The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Barb	Maynard	Fort Collins	CO	The Northern Cheyenne Tribal Council unanimously voted against the idea. Maybe it's time to start listening to people instead of dollars. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Larry	Handsaker	Billings	MT	The ranchers and farmers of Eastern Montana deserve to keep their hard earned lands open and free as well. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
Rita	Rozier	Livingston	MT	The U.S. cannot on one hand lead the world toward clean energy and a safer environment while the other hand is seizing coal profits. There is no more time for money-grubbing by imperiling the planet. Please say no to the Tongue River Railroad and coal exportation. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. It is now cheaper to generate our electricity by building clean wind turbines and solar panels, not dirty coal.
Alec	Herr	Boulder, CO	CO	
David	Lenderts	Alamosa	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. LEAVE THE COAL IN THE GROUND. PROMOTE RENEWABLES AND EFFICIENCY. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Really really really bad idea!
Lise	Hildebrandt	Longmont	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Are we even being serious about this, how foolish are we to continue to promote and develop coal, please do what is prudent and prevent this track from being laid.
John	Sullivan	Denver	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. It would also destroy many family ranches unnecessarily.
Ron	Kaminski	Billings	MT	

Blake	Harvey	Snowmass	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Nothing of humanity's perceived importance will matter if the Earth that inhabits us is destroyed.
Julius	Ostby	Billings	MT	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Really? More fossil fuels? We need to stop extraction NOW! Already, it's hard to hope...
Darren	Kisor	Pray	MT	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. We need to follow sustainable energy, solar and wind and give up on coal
Bartley	Deason	Darby	MT	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Your "all of the above" should not be leaning so heavily towards the coal industry.
Thomas	Slabe	Lakewood	CO	The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and, at worst, a climate disaster, and should be rejected. Capitalists and oligarchs had their day with fossil fuels. Now they are entrenched and addicted to profits from sale of their toxic products. And it totally inexcusable that a private entity should be allowed to export toxic, dirty hydrocarbons overseas. There are no doubt tax loopholes that will allow such entities to cheat on their taxes while the workers, the insignificant numbers of them who will work to extract the coal, will pay a greater percentage of their salaries/wages than the company. I say NO. DON'T permit it. It's not good for America in the least. Fossil fuels burned overseas still pollute the air over America. The mercury, especially from coal plants in other countries, emissions from burning coal still pollutes our waters and we eat s The Tongue River Railroad would be a fast track to climate destruction. An administration that claims to be an environmental leader must oppose it's construction and use. I certainly oppose it.
Jacqueline	Weller	Denver	CO	All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.

Thomas	Teters	Ft. Collins	CO	The Tongue River Railroad would be a fast track to climate destruction. There is 500 years worth of coal already being mined in NE Wyoming. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. Let them invest in a Green Technology, wind or solar. The Tongue River Railroad would be a fast track to shipping millions of tons of coal overseas. Is this how you work on combating climate change?
				This railroad is unbelievably counter-productive, serving only to dig up more fossil fuel.
Katherine	Delanoy	Eagle	CO	Please stop it! The Tongue River Railroad would be a path to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and must be rejected. THIS PROPOSAL IS BACKED BY PEOPLE WHO DON'T CARE ABOUT THE ENVIRONMENT, OR ABOUT THE FUTURE OF AMERICA. THIS PROPOSAL ASKS THE AMERICAN PEOPLE TO INVEST IN OUR OWN DEMISE. LET US NOT TAKE THIS STEP BACK. The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected. When are we going to stop giving these corporations special deals even when they don't benefit our country? The Tongue River Railroad would be a fast track to climate destruction. All of the coal it would carry must be left underground if we are going to avoid catastrophic climate change. It's at best useless, and at worst a climate disaster, and should be rejected.
