My environmental concern is in regard to the proposed Great Lakes Basin Railroad. This railway would decimate agricultural farmland and the surrounding communities that have lived here for generations. I love this community and the families who have built it. Also, if this goes through, my children will lose their amazing school system in the Grant Park community as well as the amazing teachers who are shaping their minds. The pride in a small local community like this is like nothing else. I cannot fathom the thought of being pushed away from my hardwork for the sake of someone else's profit. I ask that you please consider the negatives imposed by this railway that would destroy the very farms and communities that feed this nation.

Thank You for your consideration.

Alisa Lacheta, Grant Park, IL. resident
