How will CN's proposed acquisition of the EJ&E impact you?

The EJ&E line crosses near & through numerous wetlands and marshes. The impact to this fragile environment, birds, wildlife will be devastating.

Traffic on our roads are currently at full capacity. The impact of further restrictions to traffic flow will create hardships for the thousands of residents commuting for work.

Safety of our young drivers which so many reside in our bedroom communities will be compromised. Wreckful deaths will occur due to the frequency of the tracks. Many youths and their lives will be negatively affected.

Why are we allowing a foreign country to create so much trouble for our U.S. citizens? Our property values are at stake!
