Transcript:

If this is the recording the start of the recording, I am all for the railroad purchase. Our crossings here in Chicago Ridge, sometimes 45 minutes out of the hour the crossings are tied up. The only way to go around is is a very it's a long way to go around and then sometimes when you go around you find out that's blocked off because everyone is trying to going around. I wonder sometimes about ambulances or just sitting there idling with your motor running and everyone wasting gas and gas is kinda precious. This is unacceptable! There's at least four railroads sometimes the trains come two or three in a row. It just blocks everything up cause right down the street there's a passenger train. And they've even got to take turns. It's just a terrible mess over here and I really think the railroad partner should go in to play because it would relieve some of the traffic around here. Thank you.
