As a resident of the area potentially effected by the purchase of the EJ&E rail line in Illinois by the CN Rail, I dismayed and fearful of the environmental impact that would occur. The rail lines in the Barrington area run through and/or near forest preserves and marshes, which were intended for the purpose of environmental protection. To increase rail traffic by more than 400%, as proposed by the purchase, endangers the very flora, fauna, and wildlife that seek refuge in that area!!! At some point the environment should start to matter!
