

January 11, 2013
Docket No. FD 30186

Dear Mr. Blodgett,

The Tongue River Valley is one area that will be impacted by coal trains going from Montana to China. Imagine the fines to humans, property, animals, plants, water, air, health of all.

This destruction of habitat, food products, the traffic delays, noise will also put the burden on taxpayers to pay for the overpasses and safety crossings, loss of value on their homes and their health.

The coal should stay in the ground. Carbon Dioxide emissions and all else that I mentioned makes this project of Coal from Montana to China grossly absurd.

Thank you for taking all my concerns into consideration.

Sincerely,

Judith Susan Langhans
