Transcript:

I would like to urge you to not support the Canadian National acquisition of the EJE line. There's a lot of different reasons for this, environmental, safety, cost, my neighborhood backs up right to the tracks. The whole impact environmentally will be awful in terms of noise, dust, traffic that is going to be held up. And the traffic of course that congestion will impact safety issues in terms of emergency vehicle, children in the area. Having the CN railroad buy these tracks does not solve the problem of being in Chicago the congestion down there. It just moves it further out. It will impact people in the same way. It seems like tracks could be built in a less populated area and that would perhaps alleviate some of the problems existing now. But just moving them out to the EJE line is not a solution. Please do not support this bill. Thank You very much.
