Title	Business			Dept	
Address	13462 Blackstone Lane				
Address 2					
City	Plainfield	State	IL	Zip	60585

Transcript:

I'm calling regarding the STB number 35087. We are highly opposed to this. We have a significant amount of trains that come through our area right now that slow down traffic that congest our area. We do not have enough work around as it is to get where we need to go, so we need to stop this from happening, we do not think it's a good idea for these trains to be able to come through the town of Plainfield or Joliet, it's just going to congest more traffic. If some of these trains are going to be two miles long, do you know how long commuters are going to have to sit there to wait to get through? It's going to congest everything in a very congested area already. So we are very opposed to this and we have enough traffic and enough congestion already. So, again <repeated name and address> are highly opposed to the acquisition for the CJ&E Railroad. If you have any questions or concerns or need any more information, we'd be happy to speak to you at 815-577-6406. This will increase noise, this will also slow down emergency response times, if there's accidents and god forbid a train is coming through, they won't be able to get to these accident sites and god forbid, save these peoples lives, there will be significant delays and the neighboring towns around us that use our streets to get to where they need to go are also going to feel this impact, so you're going to congest our cities even more and that is not what we need, we're trying to uncongest them right now. So, we are highly opposed to this. Thank you very much and have a great day.
