

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date:

8/27/08

I continue to vehemently protest the proposed transaction. Please defend us from this assault on our community. The emergency response times of fire and ambulances will be significantly decreased. Pedestrians will not be safe in our downtown. The impact of vibration, noise and emissions on our neighborhoods, parks and forest preserves would be devastating. Gridlock in-town would be very dangerous.

Please assure us that we are protected from a solely business/profit motivated transaction that impacts all areas of our lives.
