R2

Docket Number - 0
FD-34284-
1/26/07

We the undersigned residents of Medina County support Vulcan Materials' Company in their efforts to develop a quarry and rail line in Medina County. We believe that the quarry will bring much-needed jobs to Medina County and we believe that the rail option for transporting materials from the quarry is a safer and cleaner alternative than the numerous truck trips that would be required to transport the same material. We highly encourage the Texas Commission on Environmental Quality and the Federal Surface Transportation Board to quickly approve the quarry and rail line.

We the undersigned residents of Medina County support Vulcan Materials' Company in their efforts to develop a quarry and rail line in Medina County. We believe that the quarry will bring much-needed jobs to Medina County and we believe that the rail option for transporting materials from the quarry is a safer and cleaner alternative than the numerous truck trips that would be required to transport the same material. We highly encourage the Texas Commission on Environmental Quality and the Federal Surface Transportation Board to quickly approve the quarry and rail line.

We the undersigned residents of Medina County support Vulcan Materials' Company in their efforts to develop a quarry and rail line in Medina County. We believe that the quarry will bring much-needed jobs to Medina County and we believe that the rail option for transporting materials from the quarry is a safer and cleaner alternative than the numerous truck trips that would be required to transport the same material. We highly encourage the Texas Commission on Environmental Quality and the Federal Surface Transportation Board to quickly approve the quarry and rail line.
