Transcript:

I am calling to say that I am very much opposed to this EJ&E um railroad purchase by the Candian um Railroad Acquisition thing, um we do not have, we have a population out here that just cannot impact freight trains coming through at all times. We also do not want Canadian waste or whatever they are um running through here to come through our town. We're smaller towns, we hardly have any north-south roads as it is and we don't need them to be tied up by freight trains. We, we have too much of a congestion problem already, so I am definitely going to spread this word around to all of my neighbors and friends who live in the area, because this is something that none of us want.
