

Dear Phyllis,

My family as well as all of my neighbors consider this train issue to be a major issue and big problem for the many suburbs involved including Lake Zurich in which I live.

The increased traffic due to waiting for these trains to pass will stifle the growth of Lake Zurich at a time where we are having enough issues trying to create a tax base to offset the taxes we pay.

The noise and vibration will be much louder and longer. I live about 1 mile from the tracks now with many, many trees in between and the sound still carries very well.

Please hear our concerns and act accordingly!

-Thanks

Kevin Kah
