Transcript:

I do support the Canadian National proposal to buyout the EJ&E because I have been waiting for trains here for almost 40 years. Just the other night coming home from church, I was in no big hurry anyway, and I counted the cars, there was like 170 cars on that thing and it was moving very slowly, it was over 20 minutes to get through there. I know it would be causing problems for other people, but if you can solve my problem, I support the buyout.
