Dave – LIRC and CSXT are expecting traffic increases on the southern portion of the L&I Line (Seymour and south) within the next few months. In preparing to comply with the requirements of conditions VM 33 and MM 8, we have noticed a discrepancy in the format requirements. VM 33 requires “The format and lettering of these signs will comply with the Federal Highway Administration’s (FHWA’s) Manual on Uniform Traffic Control Devices (FHWA 2012).” MM 8 requires “The format and lettering of these signs shall comply with the Federal Highway Administration’s 2007 Manual on Uniform Traffic Control Devices.” The parties would like to comply with the same requirements for both sets of signs. We propose using the 2009 Edition as modified in 2012. We believe that this is the latest version. We also believe that Chapter 8A is the appropriate Chapter for the signage requirements (reflectorization (Section 8A.04) and size of 36 x 18 (Table 8B-1, the LOOK sign)). Please confirm that this will comply with the requirements adopted by the Board from the Final Ea. Let me know if you have any questions or would like to discuss. Thanks. Lou
