Josh –

Attached are the marked-up maps you sent on Wednesday. Comments are limited to suggesting use of “Study Area” instead of “Route” to indicate the general character of each route, and correction of river naming.

Subject: Uinta Basin Railway--Alternatives Maps

Mark and Kevin,

I have attached several maps that OEA intends to append to our forthcoming preliminary consultation letters to appropriate federal, state, and local agencies. As we discussed, could you please confirm that these maps accurately represent the alternative routes at this scale? If you anticipate making changes to the alternatives that could affect these maps, we would prefer to postpone sending the consultation letters until those have been made so that our cooperating and consulting agencies have the most recent and accurate maps to review.

Thanks for your help,
Josh
