We received a copy of **Surface Transportation Board, Washington, DC 20423, Environmental Assessment, STB Finance Docket No. 35218, Meridian Southern Railway, LLC - Construction of Connecting Track Exemption - in Lauderdale County, MS.** We have comments regarding this environmental assessment.

We have been communicating with Peter Denton of K & L Gates in Washington, DC and representatives of the consulting engineer, Engineering Plus of Meridian, MS concerning this matter for some time now, and we have concerns about this project.

On page 4 of the Assessment, 2nd paragraph, a statement reads: "MDS does not anticipate any adverse effects to essential public services as a result of the proposed connecting track construction." We take exception to this statement. There are two sanitary sewer lines and one water line that are crossed by the proposed extension, one 12" and one 8" sewer lines and one 8" water line. In our conversations with the consultants, they have not satisfactorily demonstrated to us how they are going to construct the proposed extension over our existing utility lines. In addition, the proposed extension increases the number of rail lines within the area that we have to deal with concerning our utility lines' maintenance and expansion plans.

We are not opposed to the proposed extension and we support expansion plans by Meridian Southern Railway, LLC; however, they must address the issues regarding our existing utility lines. We request that the Surface Transportation Board would seriously consider our concerns and not grant approval of the Environmental Assessment until our concerns have been satisfied.

Please contact me at 601-485-1917 or champadcock@meridianms.org if you have any questions, or if you need further information. Thanks.

Sincerely,

Champ Adcock, E.I.
Acting City Engineer
City of Meridian, MS
