Transcript:

We are one of the suburbs that will be impacted by the CN purchase of the EJ&E railroad. I want to express my sincere objection to this, as this is a community that has grown and expounded in the whole area, it's overwhelming the growth, and we do not have but one underpass for a railroad in this town. Sunday the 28th of September I heard that this was already passed, we were still able to call in or write in with our comments regarding this proposal, and I understand this is a Sunday that it has already been secured and will be in effect. How can that be? Our voices are not being heard. Please please reconsider, as you are impacting lives of 1000s of people, as this is the most growing area in the whole midwest.
