December 2, 2004

Comment Form

Name Joyce Landrum

Address 776 CR 354 Hondo TX

- ☐ I wish to speak today.
- ☐ I do not want to speak but would like SEA to read my comments at the meeting.
- ☒ I wish to submit a written comment, but do not want it read at today's meeting.

The aquifer recharge zone is directly in the path of Vulcan's operation. I am very concerned about a water well problem or a water well catastrophe where some could collapse and others would be polluted. These problems are unsolvable. We see devious tactics being used by Vulcan Minerals to gain a permit. We respectfully ask that BEFORE you make a decision, a FULL connected-action study by STB is justified for the railroad-quarry. Surely this is not just a matter of paperwork for STB. Do not give Vulcan condemnation power to condemn early Texas heritage land, historical sites, and indian mounds, and to then make this a dirty, industrial area. Thank you for the opportunity to be heard.
