Message:

This is to voice my concern about the negative impact of addition train routes to Plainfield,IL. There is only one RR over the road crossing at Rt 59. It is the only N-S road through Plainfield. All other surface crossings will experience enormous delays and the traffic on Rt. 59 to avoid the trains will also increase significantly. Unless the railroad will provide other over the road crossings, the negative impact on surface traffic through Plainfield will be enormous. Commuting north will become severely restrictive. Please find another alternative to jamming our roadways with train crossing at 3X the current rate.

Thank you.
