Docket #: - -

Subject: * GLBRL pubic comment
First Name: * James
Middle Name: Blair
Last Name: * Henderson
Address: * 4209 Cattail Run Apt 307

City: * Gurnee
State: * IL
Zip Code: * 60031-
Email Address: * henderson.blair@yahoo.com
Group/Affiliation: none

Message: I favor this project. Although some residents will see more rail traffic, more will see less, correct? This should reduce the risk of terrorist attack via rail and casualties from accidents. A new line without grade crossings diverting traffic from existing lines needing expensive grade separation projects should result in lives saved. This project should also improve Amtrak service because there will be less traffic on the lines into Chicago that are shared with freight trains. It should also reduce truck traffic in and around Chicago, thus reducing traffic, improving safety, and reducing roadway construction and maintenance expense. In fact with a nearly seventy-five percent reduction in rail travel times this effect could extend far beyond the Chicago region.
