Transcript:

I am completely against this purchase for the EJ&E line for the Canadian National Railway. I think it would be a terrible thing for our town, for students, for ambulances trying to get across. Our town is growing at a rapid speed and this would be very, very bad if we had 30 freight trains coming through here a day. I don't feel like the money that has been proposed for the overpasses is even close to being enough, our taxes are extremely high as it is and we would just not be able to afford to spend more taxes to get the proper overpasses for this proposal. I would do anything to try to get this to stop. Thank you
