

ATTN: Docket #FD 35952

July 10, 2016

Mr. Navecky
 Surface Transportation Board
 Docket Number FD 35952
 395 E. Street, SW
 Washington, DC 20423-001

Mr. Navecky,

I have reviewed the Great Lakes Basin (GLB) rail project, and my opinion is that GLB has failed to demonstrate that their project supports public convenience and necessity.

The GLB project should be stopped immediately.

They can rely on improvements by the Chicago Region Environmental and Efficiency program (CREATE).

The GLB project is for private commercial gain.

The GLB project has created undue stress as property owners deal with the threat it affords. Property values are already impacted.

Individually, or as part of a group, I will fight the GLB plan using all options available, including Congress, voting and the judicial system.
