Message: Please do not allow the take over of the EJ & E RR by Canadian National Railroad. It is a safety hazard to all the communities it will run through; upgrades will be costly and local communities should not be expected to shoulder the bill; CNR is building a port on the west coast intending to use this port to connect to their railway to import foreign goods into the US and make a huge profit; and the people of these communities, living in a democratic republic, do not want this.
