Re: Request for information on Calpuff modeling used in the DEIS for DM&E building project

Dear Ms. Rutson:

Please send me the number of CBM facilities used in the Calpuff modeling to study the air quality for the DM&E's Powder River Basin building project. The DEIS states on page 5-10 that "existing emissions" were used. For my comments I need to know how many CBM facilities were used.

Appendix E says that the Horse Creek EIS was used with updating. What was updated and what month and year for number of CBM facilities was used?

CFR 1502.21 states that material incorporated by reference should be available for inspection within the time allowed for comment. Please send the information as quickly as possible.

Send to: Nancy Darnell
1331 Morrissey Rd
Newcastle, WY 82701

My phone number is 307-746-4044 if you need further information.

Thank you,

Nancy Darnell
