cc:

Subject: FD 34242

In response to a question by the Board, I double checked the milepost and mileage information shown in FD 34242 with a planning contact I have at BNSF. He confirmed that there are several changes in milepost sequencing between Sweetwater and Clovis, which is why a simple subtraction of the two boundary mileposts does not yield the stated, and correct, 221.2 miles. If there are any other questions about this issue, please call me at (402)271-3889.
