Re: Docket No. AB-290 (Sub-No. 223X), Norfolk Southern Railway
Company - Abandonment - Between Licks Fork Spur and Elda,
Mingo County, West Virginia -- Notice of Exemption

Dear Mr. Williams:

Enclosed for filing with the Board in the captioned proceeding are an
original and ten copies of the Notice of Exemption. Also, enclosed is a check in
the amount of \$2700 to cover the filing fee.

Please acknowledge receipt on the enclosed copy of this letter and return it
to me in the self-addressed, stamped envelope.

Yours very truly,

NOTICE OF EXEMPTION

FEE RECEIVED
AUG - 8 2003
SURFACE
TRANSPORTATION BOARD

COMES NOW Norfolk Southern Railway Company ("NSR") and files this notice of exemption from regulation under 49 U.S.C. §§ 10903-10905, pursuant to the provisions of 49 U.S.C. § 10502 and 49 CFR § 1152.50, for abandonment of its line of railroad lying between Milepost TE-1.50 at Licks Fork Spur and Milepost TE-3.09 at Elda, West Virginia.

Pursuant to regulations adopted by the Interstate Commerce Commission in Ex Parte No. 274 (Sub-Nos. 8 and 8A), Exemption of Out of Service Rail Lines, 366 I.C.C. 885 (1983) and 1 I.C.C.2d 55 (1984), and by the Surface Transportation Board ("Board" or "STB") in STB Ex Parte No. 537, Abandonment and Discontinuance of Rail Lines and Rail Transportation Under 49 U.S.C. 10903, served December 24, 1996, and codified at 49 CFR § 1152.50, NSR states as follows:

Traffic Certification - §§ 1152.50(b) and (d)(2)

As the attached certificate of General Manager V. W. Mason confirms, no traffic has originated, terminated or moved overhead on this line segment for at least two years (or any overhead traffic on the line can be rerouted over other lines), and no complaint is pending with the Board or a U. S. District Court or has been decided in favor of a complainant concerning cessation of service over this line within the two-year period.

Consummation Date - § 1152.50(d)(2)

The effective date of the abandonment between Milepost TE-1.50 at Licks Fork Spur and Milepost TE-3.09 at Elda, West Virginia, will be September 26, 2003.

General Corporate Information - § 1152.22(a)(1-2) and (7)

The party filing this notice is Norfolk Southern Railway Company, a common carrier by railroad subject to STB jurisdiction under the Interstate Commerce Commission Termination Act (Interstate Transportation Act) (49 U.S.C. Subtitle IV, Chapter 105), whose representative to whom correspondence may be sent is:

James R. Paschall
General Attorney
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510
(757) 629-2759

Description of the Line and the Relief Sought - § 1152.22(a)(3-4 and 7)

The relief sought is authority for abandonment of the line. The line for which the abandonment authority is sought consists of 1.59 miles of track between Milepost TE-1.50 at Licks Fork Spur and Milepost TE-3.09 at Elda, in Mingo County, West

Virginia. A map showing the line to be abandoned, other rail lines in the area, highways, and population centers is attached as Exhibit 1 to this notice. The line traverses United States Postal Service ZIP Code 24293.

Suitability of the Line for Other Public Purposes - § 1152.22(e)(4)

NSR has received no inquiries about public use of the right of way underlying the line segment to be abandoned and is unaware of any potential public purposes to which the right of way may be suited. NSR is not aware of any restriction on the title to the property which would affect the transfer of title or the use of property for other than rail purposes, however, NSR has not yet fully researched the matter.

Labor Protection - § 1152.50(d)(2)

Since the line to be abandoned has been out of service for over two years, NSR believes no employees will be adversely affected by exercise of abandonment authority for this line. However, as a condition to exercise of the authority permitted in this matter, NSR will accept the imposition of standard labor protective conditions as set forth in Oregon Short Line R. Co. - Abandonment - Goshen, 360 I.C.C. 91 (1979).

Environmental and Historic Reports; Certifications - § 1105.7 and § 1105.8

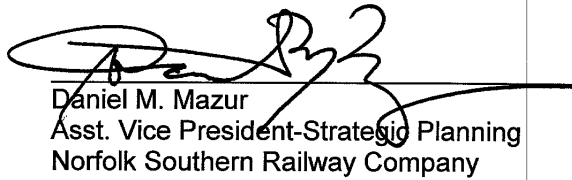

Attached are environmental and historical reports prepared and served in accordance with the Surface Transportation Board's regulations. NSR certifies that the notice and transmittal requirements of § 1105.7, § 1105.8 and § 1105.11 have been met.

Service and Newspaper Notice Requirements Certification - § 1152.50(d)(1-2)

As the attached certification indicates, NSR certifies that the service and notice requirements of § 1152.50(d)(1)(certain government agencies) and § 1105.12 (newspaper notice) have been complied with.

For the foregoing reasons, NSR believes the proposed rail line abandonment is exempt from under 49 U.S.C. §§ 10903-10905 pursuant to 49 C.F.R. § 1152.50 and requests that the Board serve the appropriate notice.

Respectfully submitted.

Daniel M. Mazur
Asst. Vice President-Strategic Planning
Norfolk Southern Railway Company

Of Counsel:

James R. Paschall
General Attorney

EXHIBIT 1

LOCATION	Licks Fork Spur - Elda, West Virginia
TITLE	Proposed Line Abandonment MP TE 1.5 to TE 3.09

EXHIBIT 2

**ENVIRONMENTAL AND
HISTORIC REPORTS**

ENVIRONMENTAL REPORT ON PROPOSED RAIL LINE ABANDONMENT

Abandonment of: 1.59 miles of track between MP TE-1.5 and MP TE-3.09 from Licks Fork Spur to Elda, West Virginia

1. PROPOSED ACTION AND ALTERNATIVES

Norfolk Southern Railway Company (hereinafter called NS) proposes to abandon use of 1.59 miles of rail line from Licks Fork Spur to Elda, in West Virginia. A Map delineating the line proposed for abandonment is attached as **Appendix A**.

The alternatives to abandonment of this line are not to abandon or to discontinue service on the line and retain the trackage in place. Not abandoning the line would avoid the temporary impacts from salvage and recycling of the rails and crossties, but eliminate the long-term environmental and social benefits.

2. TRANSPORTATION SYSTEM

Effects of the proposed action on regional or local transportation systems and patterns are expected to be negligible. Within the last two years, no rail freight or passenger traffic has moved on the line segment proposed for abandonment. Consequently, no rail traffic will be diverted to highway mode as a result of the abandonment.

3. LAND USE

- (i) The proposed abandonment involves 1.59 miles of rail line from Licks Fork Spur to Elda, in West Virginia. The land use along the rail line proposed for abandonment of service is 25% commercial, 70% undeveloped wooded and 5% residential. NS does not own the right-of-

way (ROW); therefore, future land use will be controlled by the owner and local zoning and development ordinances.

With respect to effects of the proposed rail line abandonment on land use, NS believes any impact will be negligible. The absence of traffic on the rail line proposed for abandonment indicates a substantial lack of rail dependent land uses in the service area. Since no rail traffic moves on the line over which service is to be abandoned, the abandonment is not expected to have any effect on existing land use, future land use, land use plans or the land use planning process. Therefore the proposed abandonment is expected to be consistent with any land use plans for the service area.

(ii) Prime Agricultural Lands

No effects on any prime agricultural land are anticipated as a result of the abandonment.

(iii) Coastal Zone

Not Applicable

(iv) Alternative Public Use

NS does not have fee title to all of the ROW underlying the line proposed for abandonment; therefore, NS does not have a corridor available for future public use. This factor, together with considerations related to location, physical condition, and adjacent conditions, leads NS to believe the ROW of the line proposed for abandonment would not be suitable for highways, other forms of mass transit, energy production related

transportation facilities, conservation or recreation corridors, or other public use.

4. ENERGY

(i) Development and Transportation of Energy Resources

Development and transportation of energy resources will not be affected by the abandonment. No freight or passenger traffic has moved on the line proposed for abandonment for two years, and therefore, compared with the past two years, the abandonment would have no effect on development and transportation of energy resources.

(ii) Movement/Recovery of Recyclable Commodities

Movement/recovery of recyclable commodities will not be affected by the abandonment. No freight or passenger traffic has moved on the line proposed for abandonment for two years, and therefore, compared with the past two years, the abandonment would have no effect on movement or recovery of recyclable commodities .

(iii) Impact on Energy Efficiency

Energy efficiency will not be impacted by the proposed abandonment. No freight or passenger traffic has moved on the line proposed for abandonment for two years, and therefore, compared with the past two years, the abandonment would have no effect on energy efficiency.

(iv) Diversion of Traffic to Motor Carriers

No traffic is expected to be diverted to motor carriers in connection with the proposed abandonment.

5. AIR

The proposed action is abandonment and does not exceed Surface Transportation Board thresholds at 49 CFR 1105.7 (e)(5) and therefore does not require a quantified analysis of emissions.

(i) Effects on Air Emissions

Neither the State of West Virginia, nor the County of Mingo has established analysis thresholds for air emissions, except for fugitive dusts from fugitive emission sources which could be applicable for Mingo County as stated by the WVDEP Office of Air Quality and Title 45 CSR 17. United States Environmental Protection Agency (USEPA) has National Ambient Air Quality Standards for pollutants (including ozone) as found in 40 CFR Part 50. NS does not anticipate any adverse effect on West Virginia's air quality as a result of the proposed abandonment (see **Appendix B**).

(ii) Class I or Non-Attainment Area

Mingo County, WV, is in attainment for all National Ambient Air Quality Standard (NAAQS) pollutants according to the USEPA. Mingo County is in attainment for ozone. NS does not believe any Class I or Non-Attainment areas would be affected by the proposed abandonment.

(iii) Ozone Depleting Materials

Not applicable. Transportation of ozone depleting materials (such as nitrogen oxide and freon) is not contemplated, since the proposed action is abandonment.

6. NOISE

The proposed action does not exceed Surface Transportation Board thresholds at 49 CFR 1105.7 (e)(6) and therefore does not require a quantified analysis of noise levels. Noise levels associated with rail removal or salvage operations will be temporary and will not have a significant impact on the area surrounding the proposed abandonment.

There is no federal noise regulation according to the USEPA. Neither Mingo County, nor the State of West Virginia has established analysis thresholds for noise.

7. SAFETY

(i) Public Health and Safety

Abandonment of the captioned rail line will have no significant effect upon public health or safety. At the existing grade crossings on the line to be abandoned, the potential for accidents and delays will be eliminated.

(ii) Hazardous Materials Transport

Not applicable. Action proposed is abandonment.

(iii) Hazardous Waste or Hazmat Spill Sites

NS has no knowledge of any hazardous waste sites or sites where there have been known hazardous material spills on the ROW of the line proposed for abandonment or which will be affected by this abandonment. A search of company records was conducted and comments were requested from federal, state and local agencies.

8. BIOLOGICAL RESOURCES

(i) Endangered Species/Critical Habitat

The West Virginia Department of Natural Resources has indicated no endangered species are known to occur in this portion of Mingo County. However, the US Fish and Wildlife Service has indicated that several threatened and endangered species exist in the entire State of West Virginia. A list of these species is provided in **Appendix C** and this list is summarized in Table I below.

TABLE I
ENDANGERED AND/OR THREATENED SPECIES
ENTIRE STATE OF WEST VIRGINIA

	Scientific Name	Common Name	Federal Status	State Status
Birds	<i>Haliaeetus leucocephalus</i>	Bald Eagle	LT	--
Mammals	<i>Felis concolor cougar</i>	Eastern cougar	LE	--

LE – Listed Endangered
LT- Listed Threatened
-- – Not Applicable

NS is not aware of any critical habitat that would be destroyed or modified as a result of the proposed abandonment. Since salvage operations will be handled generally within the ROW, NS does not believe that any endangered species that might be present would be adversely affected. NS is willing to undertake reasonable mitigating actions to protect any endangered species that might be encountered in connection with abandonment activities.

(ii) Sanctuaries, Refuges and Parks

Based on the site investigation and comments received from government agencies, the line segment proposed for abandonment does not pass through any parks, national forests, or wildlife sanctuaries. No adverse effects on any wildlife sanctuary, National Park, or State Park are anticipated.

9. WATER

(i) Water Quality Standards

NS does not intend to either appreciably remove or alter the contour of the roadbed underlying the rail line to be abandoned. The areal extent of disturbed areas will be kept to a minimum and limited to the ROW wherever possible. Since there are no plans to undertake in-stream work, or dredge and/or fill any materials in connection with the proposed abandonment, no water quality impacts are expected in connection with the proposed action. Therefore, NS considers the abandonment to be consistent with any applicable Federal, State, and/or local water quality standards.

(ii) Wetlands/100-Year Flood Plains

The rail line proposed for abandonment crosses Grapevine Creek as well as Lick Fork, Conley Fork streams and passes through 100-year flood plains associated with these waterways. Since the geometry of the roadbed will not be significantly altered, no discernible effects on 100-year flood plains are expected in connection with the proposed abandonment. Consequently, NS does not believe a Section 404 permit will be required in connection with the proposed abandonment.

(iii) Section 402 Permit

Inasmuch as NS does not intend to either appreciably remove or alter the contour of the roadbed underlying the rail line to be abandoned, undertake significant in-stream work, or dredge and/or fill any materials in connection with the proposed abandonment, water quality effects should be negligible. NS does not believe that a permit under Section 402 of the Federal Water Pollution Control Act will be required.

10. PROPOSED MITIGATION

Abandonment of the involved rail line is not expected to produce adverse environmental impacts. Only minimal physical activity associated with removal of rail, ties, and other railroad appurtenances will be produced by the proposed action. NS will undertake all reasonable mitigation associated with these activities to assure that physical activities associated with the abandonment do not produce adverse environmental effects.

Marshall Miller & Associates
c/o Mr. David L. Wilson, Program Manager
P.O. Box 848
Bluefield, VA 24605

Dear Mr. Wilson:

The following is in response to the fax received by this Office on March 15, 2001.

West Virginia is regulated by the National Ambient Air Quality Standards and these standards are contained in regulations 45 CSR 8, 45 CSR 9, and 45 CSR 12. These regulations have been attached for your convenience. Based on the background information that you have provided, I do not feel that these regulations will be applicable to the activities that will be occurring on the eleven railway sites listed. However, 45 CSR 17 (attached) does deal with the minimization of fugitive dusts from fugitive emission sources and could be applicable to those sites. The five counties in which the eleven railways are located are not Class I or Non-Attainment for NAAQS.

I hope that I have answered your questions. If you have any other inquiries or need clarification on any of the state regulations that have been enclosed, I can be reached at (304) 926-3624.

attachments

Sincerely,

W. Earl Billingsley Jr.
Supervisor

**TITLE 45
LEGISLATIVE RULE
DIVISION OF ENVIRONMENTAL PROTECTION
OFFICE OF AIR QUALITY**

**SERIES 17
TO PREVENT AND CONTROL PARTICULATE MATTER
AIR POLLUTION FROM MATERIALS HANDLING, PREPARATION, STORAGE
AND OTHER SOURCES OF FUGITIVE PARTICULATE MATTER**

§45-17-1. General.

1.1. Scope. -- The purpose of this rule is to prevent and control particulate matter air pollution from materials handling, preparation, storage and other sources of fugitive particulate matter.

1.2. The Director particularly urges the cooperation of municipalities in utilizing street sweepers equipped with dust capturing equipment, on a regular basis, to minimize particulate matter reentrainment into the air from heavily trafficked streets. In addition, municipalities should take such action as necessary to control fugitive particulate matter emissions arising from unpaved streets, access roads, private parking lots and any other such sources of uncontrolled particulate matter.

1.3. Authority. -- W. Va. Code §§22-5-1 et seq.

1.4. Filing Date. -- June 2, 2000.

1.5. Effective Date. -- August 31, 2000.

1.6. Former Rules. -- This legislative rule amends 45CSR17 "To Prevent and Control Particulate Air Pollution from Materials Handling, Preparation, Storage and Sources of Fugitive Particulate Matter" which was filed on March 30, 1979, and which became effective May 1, 1979.

§45-17-2. Definitions.

2.1. "Air Pollution", 'statutory air pollution', shall have the meaning ascribed to it in W. Va. Code §22-5-2.

2.2. "Director" means the director of the division of environmental protection or such other person to whom the director has delegated authority or duties pursuant to W. Va. Code §§22-1-6 or 22-1-8.

2.3. "Fugitive Particulate Matter", for the purpose of this rule, means particulate matter which becomes airborne from activities including, but not limited to: handling, transporting or storage of materials; storage structure(s); the use, repair, construction, alteration, renovation or demolition of building(s), road(s) or other activities; disposal areas; haul roads; plant grounds; public, private and industrial parking areas or lots; public and private streets and highways; mobile drills; and any other activity which generates airborne particulate matter.

2.4. "Materials" includes, but is not limited to, limestone, dolomite, iron ore, slag, coke, coal, sandstone, magnetite, sinter, sand, coal refuse, soda ash, ash, cement or earth.

2.5. "Opacity" means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.

2.6. "Particulate Matter" means any material except uncombined water that exists in a finely divided form as a liquid or solid.

2.7. "Person" means any and all persons, natural or artificial, including the state of West Virginia or any other state, the United States of America, any municipal, statutory, public or private corporation organized or existing under

the laws of this or any other state or country, and any firm, partnership or association of whatever nature.

2.8. "Statutory Air Pollution" means and is limited to the discharge into the air by the act of man of substances (liquid, solid, gaseous, organic or inorganic) in a locality, manner and amount as to be injurious to human health or welfare, animal or plant life, or property, or which would interfere with the enjoyment of life or property.

2.9. Other words and phrases used in this rule, unless otherwise indicated, shall have the meaning ascribed to them in W. Va. Code §22-5-1 et seq.

§45-17-3. Control and Prohibition of Fugitive Particulate Emissions.

3.1. No person shall cause, suffer, allow or permit fugitive particulate matter to be discharged beyond the boundary lines of the property on which the discharge originates or at any public or residential location, which causes or contributes to statutory air pollution.

3.2. When a person is found in violation of this rule, the Director may require the person to utilize a system to minimize fugitive particulate matter. This system to minimize fugitive particulate matter may include, but is not limited to, the following:

3.2.a. Use, where practicable, of water or chemicals for control of particulate matter in demolition of existing buildings or structures, construction operations, grading of roads or the clearing of land;

3.2.b. Application of asphalt, water or suitable chemicals on unpaved roads, material stockpiles and other surfaces which can create airborne particulate matter;

3.2.c. Covering of material transport vehicles, or treatment of cargo, to prevent contents from dripping, sifting, leaking or otherwise escaping and becoming airborne, and prompt removal of tracked material from roads or

streets; or

3.2.d. Installation and use of hoods, fans and fabric filters to enclose and vent the handling of materials, including adequate containment methods during sandblasting, abrasive cleaning or other similar operations.

§45-17-4. Control Programs and Schedules.

4.1. Any person operating a source of fugitive particulate matter in violation of the provisions of this rule shall submit a control program upon the request of the Director. The control program shall be embodied in a consent order as provided in W. Va. Code §22-5-4.

§45-17-5. Variance

5.1. A variance may be granted for up to ten (10) days from the requirements of this rule by the Director for conditions beyond the control of any person. Any request for a variance shall contain evidence satisfactory to the Director. Variances of over ten (10) days may be granted by the Director, provided an acceptable control program has been submitted by the person requesting said variance.

§45-17-6. Exemptions.

6.1. Sources that are subject to the fugitive particulate matter emission requirements of 45CSR2, 45CSR3, 45CSR5 and 45CSR7 shall be exempt from the provisions of this rule, provided that such sources shall not be exempt from the provisions of W. Va. Code §§22-5-1 et seq., including the provisions of §22-5-3 relating to statutory air pollution.

6.2. Normal agricultural activities shall be exempt from the provisions of this rule, to the extent that such activities do not cause, suffer, permit or allow statutory air pollution as defined in this rule.

§45-17-7. Enforcement.

7.1. Notwithstanding any other provisions in this rule, the Director may take any and all enforcement actions authorized under the Code for a violation of this rule, including, but not limited to, requiring the immediate cessation or abatement of the discharge causing or contributing to statutory air pollution.

§45-17-8. Inconsistency Between Rules.

8.1. In the event of any inconsistency between this rule and any other existing rule of the Division of Environmental Protection, such inconsistency shall be resolved by the determination of the Director and such determination shall be based upon the application of the more stringent provision, term, condition, method or rule.

8.2. Fugitive particulate matter emission requirements of any other applicable rule issued by the Director may be taken into consideration by the Director in determining compliance with this rule.

United States Department of the Interior

FISH AND WILDLIFE SERVICE

West Virginia Field Office
694 Beverly Pike
Elkins, West Virginia 26241

APR 17 2001

Mr. David L. Wilson
Marshall Miller & Associates
Bluefield Virginia Industrial Park
P.O. Box 848
Bluefield, VA 24605

Dear Mr. Wilson:

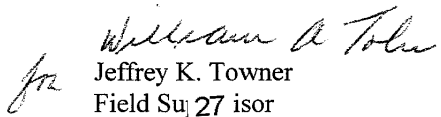

This responds to your information request of March 20, 2001 regarding the potential impacts of a proposed project on wetlands and federally listed endangered and threatened species and species of concern. Norfolk Southern Railway Company proposes abandonment of eleven line segments of railway line in Mercer, McDowell, Mingo, Raleigh, and Fayette counties, West Virginia. All work would occur in existing right of ways of existing roads or railroads. Therefore, no forest clearing would result from this project.

No federally listed endangered and threatened species or species of concern are expected to be impacted by the project. Therefore, no Biological Assessment or further Section 7 consultation under the Endangered Species Act (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) is required with the Fish and Wildlife Service. Should the project plan change, or if additional information on listed and proposed species or species of concern becomes available, this determination may be reconsidered. A compilation of federally listed endangered and threatened species in West Virginia is enclosed for your information.

Our review of the National Wetlands Inventory 7½-minute topographic maps indicates wetlands occur in the vicinity of the project area. However, definitive determinations of the presence of waters of the United States, including wetlands, and the need for permits, if any, are made by the U.S. Army Corps of Engineers. They may be contacted at: Huntington District, Regulatory Branch, 502 Eighth Street, Huntington, West Virginia 25701, telephone (304)529-5710.

If you have further questions regarding this letter, please contact Mr. Shane Jones of my staff at (304) 636-6586.

Sincerely,

Jeffrey K. Towner
Field Supervisor

SUBJECT: EPA Region 4 Approach to Railroad Abandonment Proposals

Dear Mr. Mullenex:

As discussed today with Chris Hoberg of my staff, the U.S. Environmental Protection Agency (EPA) is providing for your reference copies of recent letters concerning proposed railroad abandonments. These letters to Mr. Larry Western and Mr. James Paschall of Norfolk Southern (NS) and their letter attachments indicate the approach EPA Region 4 is currently taking regarding routine, environmentally benign railroad abandonment proposals made by NS and other rail line companies. However, should a future proposal have an environmental concern, please feel free to contact Chris Hoberg at 404/562-9619.

EPA appreciates your concern and coordination with us.

Sincerely,

A handwritten signature in black ink, appearing to read "H. Mueller".

Heinz J. Mueller, Chief
Office of Environmental Assessment
Environmental Accountability Division

**SUBJ: EPA Generic Comments on Norfolk Southern Corporation (NS) Railroad
Abandonment Proposals**

Dear Mr. Western:

As you have discussed with Chris Hoberg of my staff, NS has provided the U.S. Environmental Protection Agency (EPA) with numerous railroad abandonment proposals over the years for our comment. NS apparently seeks EPA comment to satisfy Surface Transportation Board (STB) requirements.

EPA has provided many response letters to these proposals. Most of them were generic and quite similar. Although not without impacts, the proposed abandonments would terminate the use of a line section and are generally benign environmentally. They can in fact benefit the environment if a sponsor offers to implement the rails-to-trails program along the abandoned railroad ROW. Conversely, they could also be detrimental to the environment if existing train traffic would be rerouted to a congested line and therefore result in an air quality or noise impact on that line. NS and STB should ensure that this be avoided and should promote the rails-to-trails program by proper advertisement to potential private sponsors or federal sponsors such as the U.S. Fish and Wildlife Service.

EPA does not expect to continue individually commenting on NS (or other railroad company) abandonment proposals. Instead, this generic response can be used for STB purposes *unless* NS determines there is reason to believe that the abandonment proposal is unique and substantive environmental impact would result with abandonment. In such instance, NS should provide EPA with project-specific documentation for potential review and comment. In addition, all normal coordination with federal, state and local agencies should continue (e.g., endangered species, wetlands and hazardous material/waste areas within the ROW). We also expect that future abandonment proposals be responsive to past EPA comments (for reference, see enclosed *Example of A Typical Former EPA Response*).

It should be emphasized that this letter does *not* mean that EPA has no comment on all future abandonment proposals or that there are no environmental impacts. However, EPA at this time does not elect to comment on most abandonment proposals if they are similar to those received over the years. Although we reserve the right to comment on any or all proposals pursuant to Section 309 of the Clean Air. This letter also only pertains to EPA comments and not those of any other resource agency.

We appreciate your coordination with us. Should you have questions regarding this letter, you may wish to contact Chris Hoberg at 404/562-9619.

Sincerely,

Heinz J. Mueller, Chief
Office of Environmental Assessment
Environmental Accountability Division

**SUBJ: Environmental Report; Norfolk Southern Railway Company;
Proposed Discontinuance/Abandonment of 22.1 Miles of Rail
Line From MP 862.8 to MP 884.9; Berry to Belk, Alabama in
Fayette County**

Dear Ms. Kaiser:

The U.S. Environmental Protection Agency (EPA) has reviewed the Environmental Report (ER) for the above-referenced railroad discontinuance/abandonment project in Alabama, proposed by your Norfolk Southern Railway Company (NS) applicant. Given the preliminary nature of the ER dated May 2, 1996 (and cover letter to EPA dated October 16, 1996), we offer the preliminary comments presented below for consideration by the Surface Transportation Board (STB).

EPA offers the following preliminary comments on the ER:

► **ALTERNATIVES** - EPA recommends that the environmental impacts, if any, of non-abandonment alternatives be identified and briefly compared to the impacts of the proposed action. Specifically, any environmental impacts of not abandoning the line or discontinuing line service and retaining the trackage should be discussed and compared to the proposed line abandonment (future ERs should include such information).

► **IMPACTS** - Based on the report provided, it appears that the environmental impacts of the proposed 22.1-mile railway abandonment need not be substantive. However, the line crosses several waterways a total of 24 times and in-stream salvaging work is possible. In addition, there are some conclusional statements that we believe should be substantiated before any action is taken by the STB. We note, however, that this ER is

more responsive to EPA comments than in the past.

2

We offer the following comments:

- Land Use (3.i) - We appreciate that the ER briefly characterized the land use of the project area (forests (85%), commercial businesses (5%), residential (10%)). Also relative to land use, will bisected forests, if any, be reunited due to the proposed abandonment? Will the rail line right-of-way (ROW) be maintained or allowed to naturally revegetate? Will any existing at-grade crossings be eliminated (if the proposed abandonment is implemented) which would improve transportation in terms of delays and accident potential?
- Alternative Public Use (3.iv) - The ER indicates that NS does not have fee title to all of the rail line ROW proposed for abandonment and therefore does not have a contiguous corridor for potential future public use. For this reason and others, NS does not believe the line segment would be suitable for other public use.

Although NS does not own fee title to the ROW, we would nevertheless suggest that NS determine the fate of the ROW from its owner and include such information in the ER. Would the ROW simply revert to the surrounding land use, or would the corridor be sold to the private or public sector and for what land use?

- Energy (4.i) - Although it basically follows from previous sections of the abandonment proposal, we suggest that the statement "[d]evelopment and transportation of energy resources will not be affected by the abandonment" be briefly substantiated in this section and in any future ERs. For example, the fact that rail line abandonment as opposed to construction is proposed could again be referenced here for clarity.

EPA appreciates the calculation of net change in energy consumption due to the modal change from diesel train to diesel trucks. The conclusion reached by the applicant was that a net decrease in diesel fuel gallons (3,985 vs. 5,896) would be used for a change to truck traffic. Intuitively, this seems incorrect. Considering that truck cargos (15 tons) would be considerably less than train cargos so that numerous truck trips would be needed to replace one train load. As such, it would seem that more fuel would be used for the truck option than for the train option.

This apparent inconsistency is presumably true, as the ER further indicates, to the current train configuration not

being efficient, so that train cargos are apparently undersized. We note that the ER states that "...if the railroad configured trains and trips for maximum efficiency,

3

pulpwood could be moving using approximately 43% of the estimated fuel used trucking pulpwood and using approximately 29% of the estimated current fuel usage."

■ Air (5.i, 5.ii) - We note that several air quality criteria would not be reached or exceeded by the proposed abandonment. We assume that these criteria are the STB air quality analysis thresholds frequently referred to but not generally provided in previous abandonment proposals reviewed by EPA (if so, we suggest that future ERs indicate that the listed criteria indeed are the STB air quality thresholds). We appreciate their inclusion in this ER.

If truck traffic is to replace the remaining rail traffic on the line to be abandoned, air quality could be locally impacted. Specifically, trucks could slow traffic which would involve traffic queuing (idling) or slow moving traffic, which would reduce local air quality. In addition, the additional vehicles would use diesel fuel rather than less polluting gasoline or alternate fuels (e.g., natural gas or electric). The local conditions of the preferred route(s) should be briefly characterized (ADT, traffix mix, intersections, etc.). Although we note that the ADT of the area would increase only less than 0.02%, we suggest that actual numbers be provided since percentages can be misleading. Overall air quality for the region, however, should improve if the ER analysis is accurate that less fuel would be used with trucks rather than rail in this case.

The ER states that: "Based on the foregoing discussion, increases in air emissions do not need to be quantified." This statement should be substantiated, i.e., what guidance is being employed here by the applicant?

It is also stated that "NS does not believe any Class I or non-attainment areas would be affected by the proposed abandonment." While we agree that abandonment projects would generally not affect non-attainment areas even if they existed in the project area (assuming the line no longer has rail traffic or does have inefficient rail traffic), the attainment status of the area of concern should preferably be verified in ERs (see annual 40 CFR Part 81, subject to updates, or contact the Air Division of EPA Region 4 at 404/562-9026). Any potential air quality effects should also be reasonably predicted in future ERs. As such, the ERs would be better stand-alone environmental documents prior to agency reviews.

EPA has verified that Fayette County in Alabama is in

attainment for all National Ambient Air Quality Standard (NAAQS) pollutants (including ozone), i.e., this county is not a non-attainment area for any NAAQS pollutants.

4

Therefore, it can be assumed that the salvaging process should not affect any non-attainment areas. The U.S. Department of the Interior (DOI) should be consulted for potential Class I area concerns.

■ **Noise (6)** - The ER does not list the referenced "established analysis thresholds" for noise. Their listing and a reference should be included in prospective future ERs for abandonment proposals (Note: This comment has also been made in previous EPA reviews of ERs, without inclusion or citation reference to the noise thresholds in subsequent ERs). How was it determined that these thresholds would not be exceeded?

While noise generated by the proposed action may not be substantive (especially when compared to noise from former and existing train usage of the track) or exceed the STB's noise thresholds, EPA does not agree that noise impacts from the proposed action (e.g., rail salvage) are "not applicable." Nevertheless, while the thresholds and other noise "guidelines" (such as city ordinances) may or may not be exceeded (or even exist) due to the proposed action, and sensitive residential receptors may or may not be far removed from the site (this should be determined in ERs), generation of temporary, above-ambient noise levels can be expected during rail salvage operations. What maximum/average noise levels would be expected from such an operation and how do these levels compare to the noise thresholds, other guidance or ordinances and existing railway noise?

■ **Hazardous Waste or Hazmat Spill Sites (7.iii)** - We note that "NS has no knowledge" of any hazardous waste spills or known spill sites along the ROW. What research and/or review was conducted to determine if any hazardous waste spills have occurred or sites exist along the ROW? Such substantiation should also be provided in any future applicant ERs on abandonment proposals. What procedures will be followed by NS if hazardous materials would be discovered during salvaging activities? Future ERs should already include such requested information.

■ **Biological Resources (8)**

Endangered Species/Critical Habitat (8.i) - The ER should provide a reasonable list of the federally-listed endangered species that range in the area, and if any are known to actually exist along or near the ROW. Also, what is the basis for the statement that "NS is not aware of any critical habitat which would be destroyed or modified as a

result of the proposed abandonment," i.e., what research or consultation was conducted to determine this? Future abandonment ERs should already provide substantiated

5

information on "critical habitat" (confirmation from the FWS is advised). EPA notes and supports the commitment that "NS is willing to undertake reasonable mitigating actions to protect any endangered species which might be encountered in connection with abandonment activities."

Sanctuaries, Refuges and Parks (8.ii) - It should be determined (with a documented source such as a USGS or recent aerial map, ground survey, or agency) if the line does or does not pass through any parks, forests, or wildlife sanctuaries (Note: Future ERs should already include such a determination and cite the information source). The appropriate resource agency (such as FWS) should then be consulted/copied for verification.

■ **Water (9.i, 9.ii, 9.iii)** - The rail line crosses the North River, Kerrs Branch, Sipsey River and Bobo Creek at 24 locations. The ER indicates that the line roadbed is not proposed for appreciable removal or alteration, "no discernible effects on either wetlands or 100-year flood plains are expected," and "NS does not believe a 404 wetland permit will be required in connection with the proposed abandonment." However, because the report does indicate that some in-stream work is being contemplated (i.e., "at most, some bridge piles, posts, and piers may be removed down to stream bottom level..."), the U.S. Army Corps of Engineers (COE) should be consulted regarding any impacts to jurisdictional wetlands and potential 404 permitting requirements. Also, if jurisdictional wetlands exist along or near the ROW, placement of all construction staging areas should avoid such wetlands. The U.S. Coast Guard should be contacted relative to navigational obstructions during bridge removal (if waterway crossed are navigable).

Regarding permitting requirements under Section 402 of the Clean Water Act involving point source discharges to waters of the United States, EPA has authorized the State of Alabama to administer the storm water National Pollutant Discharge Elimination System (NPDES) Permit Program (with EPA program oversight being retained). Storm water NPDES permitting could apply if the abandonment activities involve soil disturbances (grading, movement, filling, etc.) of five or more acres of land, and if there are point source discharges from these areas into waters of the U.S. (creeks, lakes, rivers, jurisdictional wetlands, etc.). EPA encourages the applicant's further coordination with the State of Alabama or EPA/Region 4 (Mr. Roosevelt Childress: 404/562-9279) regarding water quality management and any

NPDES permitting requirements. Such coordination should precede completion of future ERs and be documented therein.

6

Regardless of wetland or NPDES permitting requirements, the potential for soil erosion exists during proposed salvaging of rails and ties and bridge structures. Soil erosion should be minimized through use of state construction Best Management Practices (BMPs). Will the areal extent of disturbed areas be kept to a minimum and limited to the ROW? Will access and staging areas be involved? Is mulching and grass re-seeding proposed for disturbed construction areas along the railbed? Will state construction BMPs be followed? Prospective ERs should already include such discussion.

■ **Proposed Mitigation (10)** - We note the commitment that "NS will undertake all reasonable mitigation associated with these activities [removal of rail, ties, and other railroad appurtenances] will be produced by the proposed action." EPA encourages mitigation of impacts in general, and specifically any compensation recommended by the various review/permitting agencies.

► **FUTURE ERs** - We have noted some modifications in this ER commensurate with typical EPA comments on previous ERs for NS abandonment proposals. We appreciate the responsiveness. However, modifications for several other EPA comments were not noticed. Future ERs should be further modified in response to EPA comments.

► **EPA MOVE** - As noted on our new letterhead, EPA Region 4 has moved to 100 Alabama Street in Atlanta, Georgia. The former Environmental Policy Section has been reorganized to the Office of Environmental Assessment in the Environmental Accountability Division.

EPA appreciates the opportunity to review the ER at this time. Per applicant cover letter request, we have provided a copy of these comments to NS. Should you have questions, feel free to contact Chris Hoberg of my staff at 404/562-9619, who will serve as the initial Agency point of contact.

Sincerely,

Heinz J. Mueller, Chief
Office of Environmental Assessment
Environmental Accountability Division

Re: Norfolk Southern Railway Company Proposed Main Line Abandonment of
3.09 Miles of Rail Line Located Between Milepost TE-0.0 and Milepost
TE-3.09 from Licks Fork Spur Junction to Elda, West Virginia

Dear Mr. Runowski:

On May 23, 2001, you were mailed an Environmental Report covering the above rail line and advised that Norfolk Southern planned to file a notice with the Surface Transportation Board of its intention to abandon that line. Due to various circumstances, the filing was not made.

The length of the line to be abandoned has been revised to 1.59 miles instead of 3.09 miles – between Milepost TE-1.5 at Licks Fork Spur to Milepost TE-3.09 at Elda. The track between Mileposts TE-0.0 and TE-1.5 at Licks Fork Spur Junction will be not be affected by the abandonment.

We are planning to file the notice on or about June 20, 2003. Accordingly, we are resubmitting the enclosed Environmental Report to provide you the opportunity to make additional comments if you desire. There has been no rail service over the line in more than 4 years. Therefore, it is unlikely there have been any significant changes that would cause the enclosed report to be obsolete since its submission in 2001.

Please do not hesitate to contact me if you have any questions.

Very truly yours,

Sandra J. Gorby

Dear Mr. Stihler

On May 23, 2001, you were mailed an Environmental Report covering the above rail line and advised that Norfolk Southern planned to file a notice with the Surface Transportation Board of its intention to abandon that line. Due to various circumstances, the filing was not made.

The length of the line to be abandoned has been revised to 1.59 miles instead of 3.09 miles – between Milepost TE-1.5 at Licks Fork Spur to Milepost TE-3.09 at Elda. The track between Mileposts TE-0.0 and TE-1.5 at Licks Fork Spur Junction will be not be affected by the abandonment.

We are planning to file the notice on or about June 20, 2003. Accordingly, we are resubmitting the enclosed Environmental Report to provide you the opportunity to make additional comments if you desire. There has been no rail service over the line in more than 4 years. Therefore, it is unlikely there have been any significant changes that would cause the enclosed report to be obsolete since its submission in 2001.

Please do not hesitate to contact me if you have any questions.

Very truly yours,

Re: Norfolk Southern Railway Company Proposed Main Line Abandonment of
3.09 Miles of Rail Line Located Between Milepost TE-0.0 and Milepost
TE-3.09 from Licks Fork Spur Junction to Elda, West Virginia

Dear Mr. Billingsly:

On May 23, 2001, you were mailed an Environmental Report covering the above rail line and advised that Norfolk Southern planned to file a notice with the Surface Transportation Board of its intention to abandon that line. Due to various circumstances, the filing was not made.

The length of the line to be abandoned has been revised to 1.59 miles instead of 3.09 miles – between Milepost TE-1.5 at Licks Fork Spur to Milepost TE-3.09 at Elda. The track between Mileposts TE-0.0 and TE-1.5 at Licks Fork Spur Junction will be not be affected by the abandonment.

We are planning to file the notice on or about June 20, 2003. Accordingly, we are resubmitting the enclosed Environmental Report to provide you the opportunity to make additional comments if you desire. There has been no rail service over the line in more than 4 years. Therefore, it is unlikely there have been any significant changes that would cause the enclosed report to be obsolete since its submission in 2001.

Please do not hesitate to contact me if you have any questions.

RE: Proposed Main Line Abandonment
Milepost TE-1.5 and Milepost TE-3.09
FR#: 01-1054-MO-1

Dear Ms. Gorby:

We have received the information for the above mentioned project. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

Architectural Resources:

We require additional information in order to complete our review. Your report does not address potential impacts to historic resources such as the rail line itself or associated buildings and structures. Nor is there any information provided regarding the railroad's history in order for us to make an assessment of the resource's National Register eligibility. If there are any buildings or structures 50 years or older associated with this section of the rail line, please submit photographs along with the other requested information. We will complete our review upon receipt of this information.

Archaeological Resources:

We require additional information in order to complete our review. Please submit photographs of the segment of line in question. We will complete our review upon receipt of this information.

We appreciate the opportunity to be of service. If you have questions regarding our comments or the Section 106 process, please call Robin Fisher, Historian or Rachel Black, Staff Archaeologist at (304) 558-0240.

Sincerely,

Susan Pierce
Deputy State Historic Preservation Officer

SUBJECT: Norfolk Southern Railway Company Proposed Main Line Abandonment of 3.09
Miles of Rail Line Located between Milepost TE-0.0 and Milepost TE-3.09
From Licks Fork Spur Jct. To Elda, West Virginia

Dear Mr. Runowski:

Norfolk Southern plans to file an application with the Surface Transportation Board (STB) seeking authority to abandon rail service from MP TE-0.0 to MP TE-3.09 (Licks Fork Spur Jct. to Elda) in Mingo County, West Virginia. Attached is an Environmental Report describing the proposed action and any expected environmental effects, as well as a map of the affected area.

We are providing this report so that you may review the information that will form the basis for the STB's independent environmental analysis of the proceeding. If you believe any of the information is misleading or incorrect, if you think pertinent information is missing, or if you have any questions about the Board's Environmental Review process, please contact the Section of Environmental Analysis (SEA), Room 3219, Surface Transportation Board, 1925 K Street, N.W., Washington DC 20423, Telephone (202) 565-1538 and refer to the above Docket. Because applicable statutes and regulations impose stringent deadlines for processing this action, your written comments (with a copy to us) would be appreciated within three weeks.

Your comments will be considered by the Board in evaluating the environmental impacts of the contemplated action. In order for us to consider your input prior to filing our application with the STB, we must receive your comments within three weeks. Please either provide a copy of your comments by mail at the address shown on this letterhead or provide information by telephone to Mr. Larry Western at (540) 981-4239.

Sincerely,

HUNTINGTON, WEST VIRGINIA 25701-2070

June 19, 2001

REPLY TO
ATTENTION OF:
Operations and Readiness Division
Regulatory Branch
Tug Fork-No Permit Required-200100565

Norfolk Southern Corporation
Director Environmental Operations
Attn: K.R. Miller
110 Franklin Road, S.E.
Roanoke, Virginia 24042-0013

Dear Mr. Miller:

I refer to information received in this office on June 6, 2001 concerning the proposed abandonment of 28.4 miles of rail line located in Mingo County, West Virginia and Pike County, Kentucky. You have indicated that portions of these lines cross the Tug Fork River, unnamed tributaries (U/T) of Poplar Creek, Laurel Fork, Blackberry Creek, Sycamore Branch, U/T of Sycamore Creek, Grapevine Creek, Lick Fork, Conley Fork, Spice Creek, U/T of Spice Creek Shabby Room Branch, Little Day Camp Branch, Honey Camp Branch and Stonecoal Branch. In addition, wetlands are present in the vicinity of portions of the rail line.

You have requested that we determine whether a permit should be obtained for the work associated with the abandonment of 11 portions of rail lines.

	Section of Rail Line to be Abandoned	Miles
1	*Cedar, WV to Majestic KY	2.28
2	**Bluestone, WV to Pocahontas, VA	1.9
3	Oak Hill, WV to Carlisle, WV	2.8
4	*McCarr, WV to Nampa, KY	.95
5	Williamson, WV to Cinderella, WV	2.5
6	Licks Fork Spur Jct., WV to Elda, WV	3.09
7	Roderfield, WV to Premier, WV	4.58
8	Amigo, WV to Devils Fork, WV	1.5
9	McVey, WV to Whitby, WV	4.0
10	Oak Hill, WV to Oak Hill, WV	2.5
11	Thacker, WV to Colonel, WV	2.3
TOTAL		28.4

*These two sections of abandonment cross the Tug Fork River and reside in both KY and WV.

**This portion of abandonment is partially located in the Norfolk District of the U.S. Army Corps of Engineers. All rail line abandonment in the state of Virginia should be coordinated through the Norfolk District. The Clinch Valley regulatory field office may be reached by dialing 540-623-5259.

Section 404 of the Clean Water Act requires that a Department of the Army permit be obtained prior to placing dredged or fill material into waters of the United States, including wetlands. Based on the information provided, it appears that no fill material would be placed into jurisdictional waters; therefore, authorization under Section 404 of the Clean Water Act for the proposed work would not be required. However, if any work becomes necessary that would require the placement of fill material into waters of the United States at any site of proposed rail line abandonment, you should contact this office.

Section 10 of the Rivers and Harbors Act of 1899 requires that a permit be obtained prior to any work in, over, or under navigable waters. You have indicated that bridge trestles crossing the Tug Fork River would not be removed during abandonment activities. Provided that these crossings would be used at some time in the future, trestles may remain in place.

Please be aware that the Corps of Engineers does not have regulatory authority for administering the 100-year floodplain regulation pursuant to the National Flood Insurance Program. This authority lies with the local government using floodplain ordinances approved by the Federal Emergency Management Agency.

If you have any questions concerning the above, please contact Michael Hatten at 304-529-5710.

Sincerely,

Richard P. Buckley

Main Line Abandonments; 2.5 miles Williamson,
WV to Cinderella, WV, 3.09 miles Licks Fork Spur
Jct. to Elda, WV, 1.9 miles Bluestone, WV to
Pocahontas, VA, and 2.28 miles Cedar, WV to
Majestic, KY.

Dear Mr. Miller:

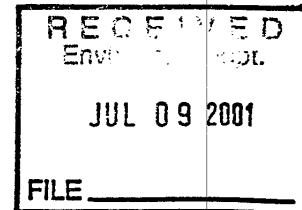

Thank you for the opportunity to comment on the proposed Main Line Abandonments. To protect water quality in these regions, we request that appropriate sediment and erosion control measures be implemented during the rail and tie removal phases of these projects. At this time, we anticipate no long term adverse environmental affects from these actions and thus we have no further comments.

Sincerely,

A handwritten signature in cursive script that reads "Ed Hamrick".

Building 3 Room 669
Charleston, West Virginia 25305-0660

SUBJECT: Norfolk Southern Railway Company Proposed Main Line Abandonment of 3.09
Miles of Rail Line Located between Milepost TE-0.0 and Milepost TE-3.09
From Licks Fork Spur Jct. To Elda, West Virginia

Dear Mr. Hamrock:

Norfolk Southern plans to file an application with the Surface Transportation Board (STB) seeking authority to abandon rail service from MP TE-0.0 to MP TE-3.09 (Licks Fork Spur Jct. to Elda) in Mingo County, West Virginia. Attached is an Environmental Report describing the proposed action and any expected environmental effects, as well as a map of the affected area.

We are providing this report so that you may review the information that will form the basis for the STB's independent environmental analysis of the proceeding. If you believe any of the information is misleading or incorrect, if you think pertinent information is missing, or if you have any questions about the Board's Environmental Review process, please contact the Section of Environmental Analysis (SEA), Room 3219, Surface Transportation Board, 1925 K Street, N.W., Washington DC 20423, Telephone (202) 565-1538 and refer to the above Docket. Because applicable statutes and regulations impose stringent deadlines for processing this action, your written comments (with a copy to us) would be appreciated within three weeks.

Your comments will be considered by the Board in evaluating the environmental impacts of the contemplated action. In order for us to consider your input prior to filing our application with the STB, we must receive your comments within three weeks. Please either provide a copy of your comments by mail at the address shown on this letterhead or provide information by telephone to Mr. Larry Western at (540) 981-4239.

Sincerely,

A handwritten signature in black ink, appearing to read 'K. R. Miller', written over a horizontal line.

RE: Proposed Main Line Abandonment
Milepost TE-0.0 and Milepost TE-3.09
FR#: 01-1054-MO

Dear Mr. Miller:

We have received the information for the above mentioned project. As required by Section 106 of the National Historic Preservation Act of 1966, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

The "Environmental Report on Proposed Rail Line Abandonment" for the 3.09 miles of railroad line from Licks Fork Spur Junction to Elda, Mingo County, West Virginia, does not specifically address potential impacts to historic resources such as the rail line itself or associated buildings and structures. Nor is there any information provided regarding the railroad's history in order for us to make an assessment of the resource's National Register eligibility.

Please submit additional information addressing our above inquiries. We cannot continue with our review without these relevant facts. Also, please note that the subject material did not reach our office until June 7, 2001, and, therefore, we were unable to meet the requested three week comment period. However, under 36 CFR 800 our office is allowed thirty days upon receipt of a project to comment on its impact to cultural resources listed in or eligible for the National Register of Historic Places or to request additional information to assist in our analysis. As such, we have met our statutory obligation with this response.

We appreciate the opportunity to be of service. If you have questions regarding our comments or the Section 106 process, please call me at (304) 558-0220, Ext. 723.

Sincerely,

Marc Holma

Norfolk, Virginia 23510-9241

Dear Ms. Gorby:

The Division of Air Quality (DAQ) has reviewed your letter of May 8, 2003 concerning the abandonment of rail lines near Elda, West Virginia.

The DAQ finds that the work described in your subject letter has no applicability to West Virginia air quality rules other than 45CSR17 and 45CSR15. Rule 45CSR17 seeks to control dust from activities that may generate fugitive emissions during the demolition process. Rule 45CSR15 establishes requirements for demolition as they relate to the hazardous air pollutant asbestos. Rule 45CSR15 is an incorporation of requirements contained in the Federal rule 40CFR61 and 40CFR65. Rule 45CSR15 may require the inspection of certain facilities on the rail line, i.e. bridges, for asbestos containing materials. Question concerns the requirements of 45CSR15 may be directed to Mr. Leonard Womble of the DAQ at 304-926-3649.

If I may be of further help, please contact me at 304-926-3624.

Sincerely,

W. Earl Billingsley, Jr., P.E.

Re: Docket No. AB-290 (Sub-No. 223X), Norfolk Southern Railway Company --
Abandonment -- between Licks Fork Spur and Elda, West Virginia

Dear Ms. Pierce:

On or about August 5, 2003, we expect to be filing with the Surface Transportation Board a notice of exemption seeking authority to abandon 1.59 miles of rail line located between railroad milepost TE-1.50 at Licks Fork Spur and railroad milepost TE-3.09 at Elda, West Virginia. Attached is a Historic Report describing the proposed action and any expected historic effects, as well as a map of the affected area.

We are providing this report so that you may review the information that will form the basis for the Board's independent environmental analysis of this proceeding. If you believe any of the information is misleading or incorrect, if you believe that pertinent information is missing, or if you have any questions about the Board's environmental review process, please contact the Section of Environmental Analysis (SEA), Surface Transportation Board, 1925 K Street, N.W., Washington, D. C. 20423-0001, Telephone (202) 565-1545, and refer to the above Docket. Because the applicable statutes and regulations impose stringent deadlines for processing this action, your written comments (with a copy to me) would be appreciated within 3 weeks.

Your comments will be considered by the Board in evaluating the historic impacts of the contemplated action. If there are any questions concerning this proposal, please contact me directly at the above telephone number or address.

Yours very truly,

James R. Paschall

HISTORIC REPORT
PROPOSED RAIL LINE ABANDONMENT

PROPOSED ACTION AND ALTERNATIVES

Norfolk Southern Railway Company (NS) proposes to abandon 1.59 miles of rail line between Milepost TE-1.50 at Licks Fork Spur Jct. and Milepost TE-3.09 at Elda, West Virginia. A map delineating the line proposed for abandonment is attached as Appendix "A".

The alternatives to abandonment of the line are to not abandon or to discontinue service on the line, retaining the trackage in place. Neither of these alternatives is economically feasible for NS.

ADDITIONAL INFORMATION

- (1) **U.S.G.S. Topographic Map** -- Maps were furnished to the West Virginia Department of Culture and History.
- (2) **Written Description of Right of Way** -- The right of way width varies, but is generally 10 feet on each side of the main track centerline. The line passes through commercial (25%), residential (5%) and undeveloped wooded (70%) areas.
- (3) **Photographs** -- Photographs were furnished to the West Virginia Department of Culture and History.
- (4) **Date of Construction of Structures** -- Construction dates are shown on the Bridges and Structures Listing attached to this report.
- (5) **History of Operations and Changes Contemplated** -- The Norfolk Southern Railway Company (NSR) line of railroad that is the subject of the notice to the

Surface Transportation Board (STB) exercising the class exemption for abandonment of an out-of-service rail line is a portion of a short spur track known as the "Licks Fork Spur." It is a 1.59-mile rail line between Mileposts TE-1.50 and TE-3.09 near Elda, West Virginia (Licks Fork Spur to Elda) in Mingo County, West Virginia that was built in 1946 by Norfolk Southern Railway Company's predecessor, Norfolk and Western Railway Company (NW). The line was constructed to serve the mines of Thacker Coal Company and later the coal operations of U. S. Steel Company. The final operator of the mine at the end of the spur was U. S. Steel Company which canceled its agreement with Norfolk and Western Railway Company in 1977. Thus, the active use of this segment of rail line lasted about 30 years.

Inasmuch as there is another location in Clay County, West Virginia that was named Elda in 1918-1920 and Elda is not listed on a current list of Mingo County locations, the Elda location in Mingo County presumably was the name of a mine or a name assigned to the point at the end of the Licks Creek Spur by the railroad. Mingo County, the youngest county in West Virginia, was formed by an act of the state legislature in 1895 from parts of Logan County because it appeared from a notorious court action (involving illegal production of moonshine) that Logan County was too large to administer. The county was named in honor of the Mingo Indians, more a multi-cultural group of Indians than a single tribe, that were subject to the control of the Iroquois Confederacy. Logan was among the most prominently known chieftains of the Mingo. The Mingo established several communities within

present-day West Virginia when European settlement pushed them into western Virginia and eastern Ohio from their original home areas near the Atlantic coast. Williamson, the county seat, was incorporated in 1892 and grew rapidly after the coming of the railroad. The famous Hatfield-McCoy family feud covered a wide area in southwestern West Virginia, including the present site of Mingo County, and parts of eastern Kentucky. Several members of both families have worked for the Norfolk Southern and Norfolk and Western in the Williamson area over the past century with no known incidents between the members of the two families.

Nancy Sue Smith published two books concerning the history of Logan and Mingo Counties: *An Early History of Mingo County, West Virginia*. Williamson: Williamson Printing, 1960, and *History of Logan and Mingo Counties, Beginning in 1617*. Williamson: n.p., 1966. See also, Brumfield, Darrell C., *Stories About Gilbert, West Virginia and Surrounding Communities*. Baltimore, Maryland, Gateway Press, 1993 and Mingo County Genealogical Society. *Heritage of Mingo*. Williamson, West Virginia, Mingo Genealogical Society, v. 1- 1985- .

There have been no shipments from the subject line in many years. There has been and is no demand for rail service over the line. However, a flood loading facility for loading coal into rail cars is being planned to be located on the remaining segment of the Licks Fork Spur between Mileposts TE-0.0 and TE-1.5. The Licks Fork Spur connects with the Norfolk Southern Railway Company main line between Williamson, West Virginia and Bluefield, West Virginia near Thacker, West Virginia at Milepost N-455.3, about 14.7 miles east of Williamson.

Norfolk and Western Railway Company was incorporated by special act of Virginia approved on January 15, 1896, and succeeded, under a plan of reorganization, to the properties of Norfolk and Western Railroad Company, the Lynchburg and Durham Railroad Company (that had been sold first to the Norfolk, Lynchburg and Durham Railroad Company) and the Roanoke and Southern Railway Company (that had been sold first to the Norfolk, Roanoke and Southern Railroad Company). The two companies in parentheses were organized on the dates of purchase for the sole purpose of acquiring and transferring the property of the named companies to Norfolk and Western Railway Company.

Norfolk and Western Railway Company's predecessor, Norfolk and Western Railroad Company, was sold at foreclosure September 15, 1896 and conveyed to Norfolk and Western Railway Company, October 1, 1896. Norfolk and Western Railway Company was incorporated by special act of Virginia approved on January 15, 1896, and succeeded, under a plan of reorganization, to the properties of Norfolk and Western Railroad Company, the Lynchburg and Durham Railroad Company (that had been sold first to the Norfolk, Lynchburg and Durham Railroad Company) and the Roanoke and Southern Railway Company (that had been sold first to the Norfolk, Roanoke and Southern Railroad Company). The two companies shown in parentheses were organized on the dates of purchase for the sole purpose of acquiring and transferring the property of the named companies to Norfolk and Western Railway Company.

The Lynchburg and Durham Railroad Company was sold at foreclosure

September 16 or 24 (two internal sources differ), 1896 and conveyed to Norfolk and Western Railway Company October 6, 1896. Norfolk, Roanoke and Southern Railroad Company conveyed the property of Roanoke and Southern Railway Company (122 miles of line between Roanoke, VA and Winston-Salem, NC) that it purchased at foreclosure November 24, 1896, together with its rights and franchises, to Norfolk and Western Railway Company on December 2, 1896. Norfolk, Lynchburg and Durham Railroad Company conveyed the property of the Lynchburg and Durham Railroad Company that it had purchased at foreclosure September 16 or 24, 1896 to Norfolk and Western Railway Company on October 6, 1896.

The Bull Creek Spur was built in 1946 near the end of the period when Norfolk and Western Railway Company built several short branches and spurs to reach coal mines in the area of southwestern Virginia and southwestern West Virginia. Some of these relatively short track segments were not used for many years after mines on the segments closed or transportation patterns changed so that the initial movement of coal has been by short haul truck movements to cleaning and processing plants or flood loading facilities for further movement by rail. Thus, several of these lines have been the subject of STB abandonment notices in recent years. NSR is not aware of any thing, event or structure with respect to or on the line of historic significance or that might distinguish it from other spurs and structures built to serve coal mines in southwestern West Virginia, many of which continue to exist. Indeed, the construction period of the line, the relatively

short period of the line's use, and recent substantial period of non-use of the subject portion of the line suggest it has no historic significance and its abandonment will not have an adverse effect on historic resources.

Norfolk Southern Corporation, a non-carrier holding company, was incorporated in the Commonwealth of Virginia on July 23, 1980. An Agreement of Merger and Reorganization, dated July 31, 1980, was the basis for Norfolk Southern Corporation control of Norfolk and Western Railway Company, headquartered in Roanoke, Virginia, and Southern Railway Company, headquartered in Washington, DC with a substantial number of its offices also in Atlanta, Georgia, and the Norfolk and Western Railway and Southern Railway subsidiaries. Norfolk Southern Corporation acquired control of Norfolk and Western Railway Company and Southern Railway Company on June 1, 1982, pursuant to approval granted by the Interstate Commerce Commission (ICC). In October 1982, Norfolk Southern Corporation established its corporate headquarters at Norfolk, Virginia.

Two studies of the Norfolk and Western Railway Company and Southern Railway Company systems provide detailed information on their history. They are: E. F. Pat Striplin, *The Norfolk And Western: A History* (Roanoke, Va.: The Norfolk and Western Railway Co., 1981) and Burke Davis, *The Southern Railway: Road Of The Innovators* (Chapel Hill, N.C.: University of North Carolina Press, 1985).

Effective December 31, 1990, Southern Railway Company changed its name to Norfolk Southern Railway Company. Norfolk and Western Railway Company became a wholly owned subsidiary of Norfolk Southern Railway Company rather

than a subsidiary of Norfolk Southern Corporation.

Pursuant to a notice of exemption filed in STB Finance Docket No. 33648, *Norfolk Southern Railway Company--Merger Exemption--Norfolk and Western Railway Company*, served August 31, 1998, Norfolk Southern Railway Company (NSR) merged Norfolk and Western Railway Company (NW) into NSR, effective September 1, 1998.

Norfolk Southern Corporation ("NSC"), parent to Norfolk Southern Railway Company ("NSR"), entered into a Transaction Agreement (the "Conrail Transaction Agreement") among NSC; NSR; CSX Corporation ("CSX"); CSX Transportation, Inc. ("CSXT"), a wholly-owned subsidiary of CSX; Conrail Inc. ("CRR"); Conrail, a wholly-owned subsidiary of CRR; and CRR Holdings LLC, dated June 10, 1997, pursuant to which CSX and NSC indirectly acquired all the outstanding capital stock of CRR. The Conrail Transaction Agreement was approved by the Surface Transportation Board ("STB") in a decision served July 23, 1998 in STB Finance Docket No. 33388, *CSX Corporation and CSX Transportation, Inc., Norfolk Southern Corporation and Norfolk Southern Railway Company - Control and Operating Leases/Agreements - Conrail Inc. and Consolidated Rail Corporation*, and the transaction was closed and became effective June 1, 1999.

Pursuant to the Conrail Transaction Agreement, certain Conrail assets were allocated to Pennsylvania Lines LLC ("PRR"), a wholly-owned subsidiary of Conrail. Furthermore, pursuant to the Conrail Transaction Agreement, PRR's assets, in turn, were leased to and are operated by NSR under the terms of an allocated assets

operating agreement between PRR and NSR (the "NSR Operating Agreement") with an original term of twenty-five (25) years from the effective date of June 1, 1999, and two optional renewal terms of five (5) years each. The Conrail Transaction Agreement permitted NSR to operate and to enter into various transactions with regard to the assets allocated to PRR. As a result of the Conrail Transaction, Norfolk Southern Railway Company's rail operations grew to include some 7,200 miles of the Conrail system (predominately the former Pennsylvania Railroad), creating balanced rail transportation in the East to benefit customers and communities alike.

On June 4, 2003, Norfolk Southern Corporation (NS), CSX Corporation (CSX), and Consolidated Rail Corporation (Conrail) announced the joint filing of a petition with the Surface Transportation Board (STB) to establish direct ownership and control by CSX Transportation, Inc. (CSXT) and Norfolk Southern Railway Company (NSR), the railroad subsidiaries of CSX and NS, respectively, of the two Conrail subsidiaries - New York Central Lines LLC (NYC) and Pennsylvania Lines LLC (PRR) that CSXT and NSR have been managing and operating. NSR and CSXT have been managing and operating the allocated assets of PRR and NYC, respectively, since June 1, 1999 under the operating agreements approved by the STB in the 1998 decision cited above. The proposed transaction would replace the existing operating agreements and allow NSR and CSXT to operate PRR and NYC, respectively, via direct ownership. The petition, if approved, would make the financial, operational and administrative management of Conrail, NYC and PRR

more efficient. No change has been requested with respect to the continuing Conrail operation of Shared Asset Areas in the Northern New Jersey, Southern New Jersey/Philadelphia and Detroit areas for the joint benefit of NSR and CSXT.

The change contemplated in the operation of the segment line of railroad track known as the Licks Fork Spur between Licks Fork Spur, WV and Elda, WV is for Norfolk Southern Railway Company to abandon the subject unused, unneeded and unproductive line of railroad, to salvage any usable materials remaining on the line and to the extent it has fee title to the real estate to deal with the right-of-way as ordinary real estate owned by Norfolk Southern Railway, probably by selling it to adjoining landowners.

Norfolk and Western Railway Company History Bibliography for West Virginia

Following is a list of a significant number of the books concerning the history of the Norfolk and Western Railway Company that include operations in West Virginia in whole or in part to West Virginia. Some of these books relate general history of the company and its operations, but with an emphasis on providing transportation for coal shipments. The listed books were limited to those of which copies are held at one or more libraries in the State of West Virginia.

(6) **Summary of Documents In Carrier's Possession That Might Be Useful for**

Documenting a Structure That Is Found To Be Historic – Bridge plans may be available for the structures on the line.

(7) **Opinion Regarding Criteria For Listing In The National Register Of Historic**

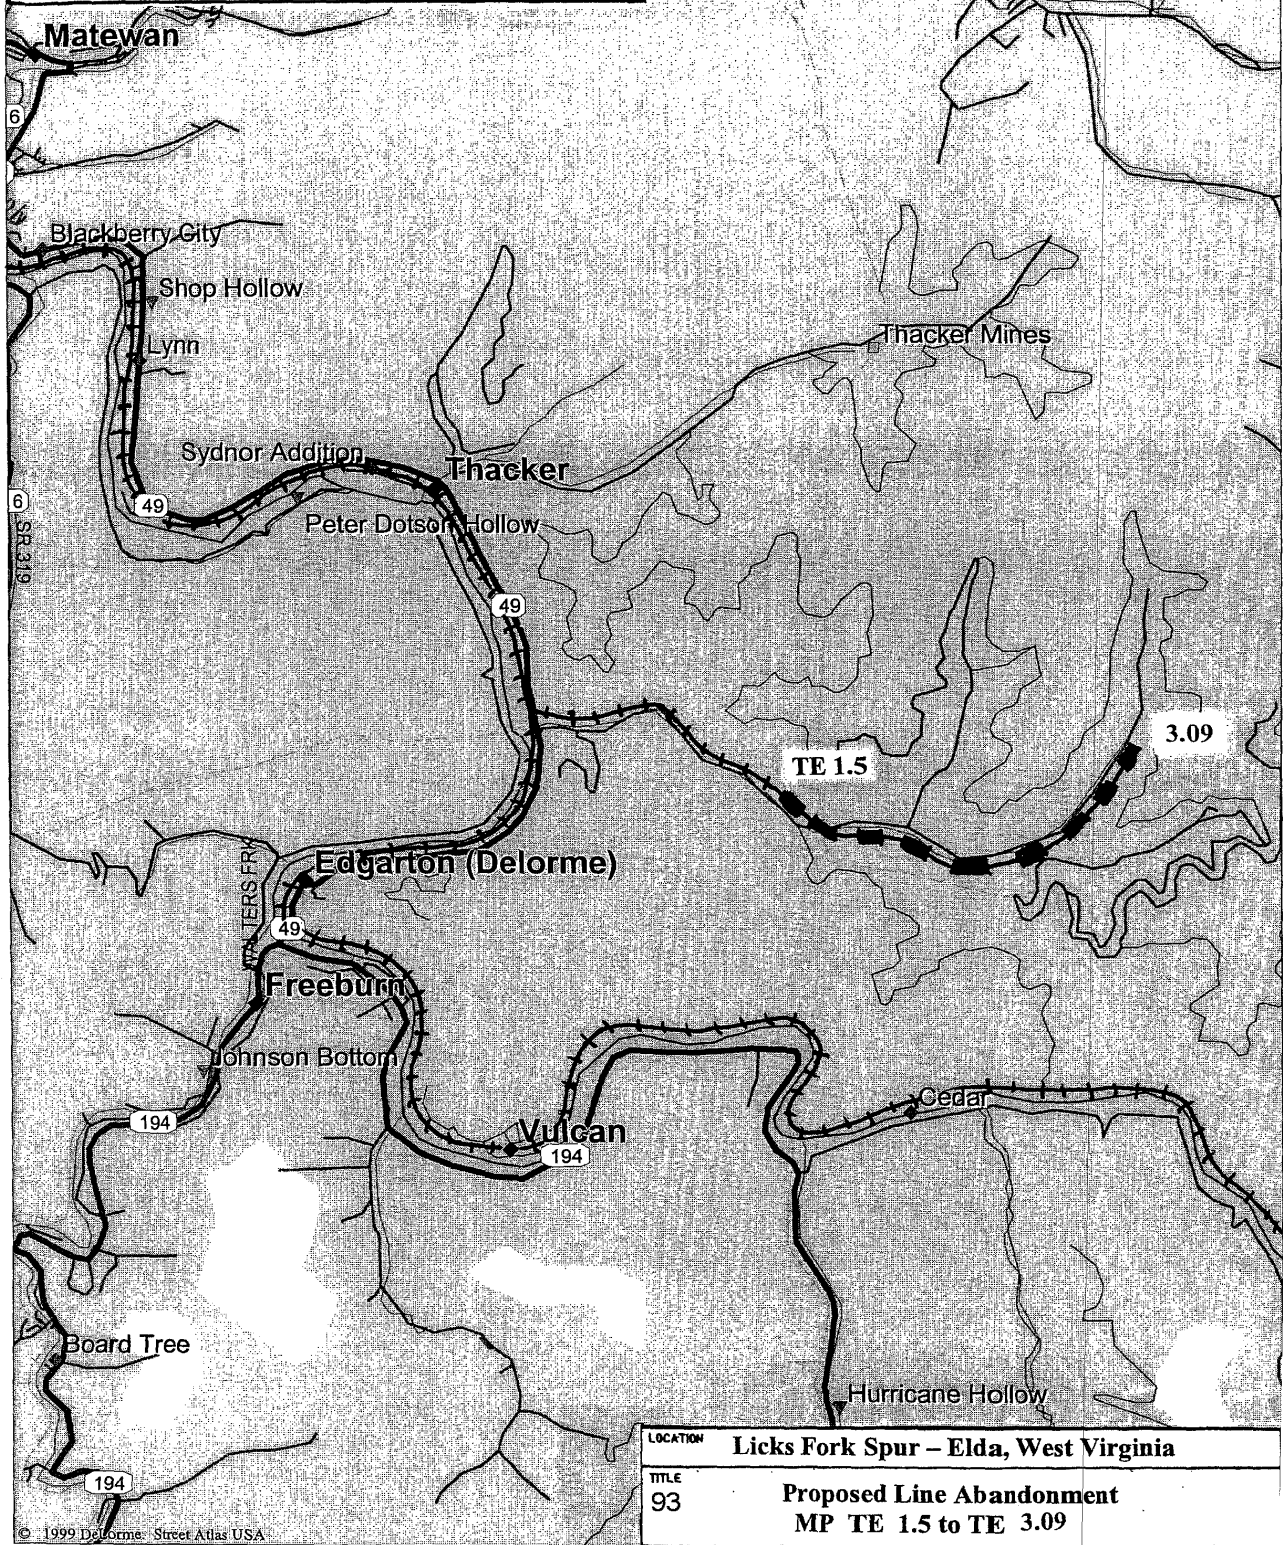

Places -- It is carrier's opinion that the structures on the line to be abandoned do not meet the criteria for listing in the *National Register of Historic Places*. The structures are small bridges which are short in length and relatively modern and ordinary in design and construction. There is nothing that distinguishes the bridges from others in the region. The line passes through commercial and residential and

undeveloped areas. Carrier has no reason to believe that there is any likelihood of finding archaeological resources or historic properties on the line proposed for abandonment.

(8) **Subsurface Ground Conditions That Might Affect Archaeological Recovery** --

Carrier is not aware of any prior subsurface ground disturbances or environmental conditions that would affect archaeological recovery.

(9) **Follow-Up Information** -- Additional information will be provided as appropriate.

Re: Norfolk Southern Railway Company Proposed Main Line Abandonment
of 3.09 Miles of Rail Line Located Between Milepost TE-0.0 and
Milepost TE-3.09 from Licks Fork Spur Junction to Elda, Mingo County,
West Virginia

Dear Ms. Gorby:

Thank you for the opportunity to comment on the changes for the proposed Main Line Abandonment. As stated in our letter of June 18, 2001, we feel that in order to protect water quality, appropriate sediment and erosion control measures must be implemented during the rail and tie removal phase of this project. At this time, we anticipate no long-term adverse environmental affects from these actions and, therefore, we have no further comments.

Sincerely,

Ed Hamrick
Director

NOTARY PUBLIC

My commission expires November 13, 2011

NOTICE OF INTENT TO ABANDON RAIL SERVICE

Norfolk Southern Railway Company gives notice that on or about August 5, 2003, it intends to file with the Surface Transportation Board (STB), Washington, DC 20423, a notice of exemption under 49 CFR 1152 Subpart F-Exempt Abandonments, permitting the abandonment of a 1.59-mile line of railroad between milepost FG-0.0, near Williamson, and milepost TE-1.5, near Licks Fork Spur, and milepost TE-3.09, near Elda, which traverses through United States Postal Service ZIP Code 26294 in Mingo County, West Virginia. The proceeding will be docketed as No. AB-290 (Sub-No. 223X).

The STB's Section of Environmental Analysis (SEA) will generally prepare an Environmental Assessment (EA), which will normally be available 25 days after the filing of the notice of exemption. Comments on environmental and energy matters should be filed no later than 15 days after the EA becomes available to the public and will be addressed in an STB decision. Interested persons may obtain a copy of the EA or make inquiries regarding environmental matters by writing to the Section of Environmental Analysis, Surface Transportation Board, 1925 K Street N.W., Washington, DC 20423-0000 or by calling that office at 202-565-1545.

Appropriate offers of financial assistance to continue rail service can be filed with the STB. Requests for environmental conditions, public use conditions, or rail banking/trails use also can be filed with the STB. AN original and 10 copies of any pleading that raises matters other than environmental issues (such as trails use, public use, and offers of financial assistance) must be filed directly with the STB's Office of the Secretary, 1925 K Street, N.W., Washington, DC 20423-0001 [See 49 CFR 1104.1(a) and 1104.3(a)], and one copy must be served on applicant's representative [See 49 CFR 1104.12(a)].

Questions regarding offers of financial assistance, public use or trial use may be directed to the STB's Office of Public Assistance at 202-927-7597. Copies of any comments or requests for conditions should be served on the applicant's representative: James R. Paschnall, General Attorney, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510-9241, (757) 628-2759.

Re: STB Docket No. AB-290 (Sub-No. 223X), Norfolk Southern Railway Company –
Abandonment Between Licks Fork Spur and Elda, West Virginia

Ladies and Gentlemen:

Pursuant to 49 CFR 1152.50(d)(1), Norfolk Southern Railway Company (NSR) hereby gives notice that on or about August 7, 2003, it will file with the Surface Transportation Board a notice of exemption from regulation in accordance with the exemption regulations set forth at 49 CFR Part 1152, Subpart F. That notice of exemption will permit NSR's abandonment of a 1.59-mile line of railroad lying between Milepost TE-1.50 at Licks Fork Spur and Milepost TE-3.09 at Elda, Mingo County, West Virginia (see attached map). No revenue traffic has originated or terminated or moved overhead on the line to be abandoned for more than two years. Based on information in our possession, the line does not contain federally granted rights-of-way. Any documentation in the railroad's possession will be made available promptly to those requesting it.

Very truly yours,

A handwritten signature in cursive script, appearing to read "James R. Paschall".

James R. Paschall
