Mr. Vernon A. Williams
Secretary
Surface Transportation Board
Section of Environmental Analysis (SEA) - Docket AB-303 (Sub-No. 27)
1925 K Street, N.W.
Washington, D.C. 20423-0001

Dear Mr. Williams:

I am writing to provide an information update and request regarding the proposed Wisconsin Central Ltd. (WCL) Abandonment in Ozaukee, Sheboygan, and Manitowoc Counties, Wisconsin, Surface Transportation Board Docket No. AB-303 (Sub.No. 27).

During May and June 2004, heavy rainfall occurred in southeastern Wisconsin. City of Kiel personnel contacted Department staff during the week of June 14, 2004, and reported that cattail mats had broken loose from the Kiel marsh during high water. The cattail mats had been transported downstream on the Sheboygan River where they and other debris were snagged by relict wooden railroad bridge piers near the WCL bridge south of Mile Post 151.8. The wooden bridge piers had not been removed from the river at some time in the past when the railroad bridge had been reconstructed. The cattail mats and debris obstructed water flow and raised water elevations upstream. Department staff authorized the City of Kiel personnel to remove the wooden piers and restore normal flow.

The Department requests that the Surface Transportation Board require WCL to inspect all the bridge crossings in the proposed abandonment corridor, and to remove any historic wooden piers down to stream bed elevation as part of any abandonment agreements.

Sincerely,

Gloria McCutcheon, P.E.
Regional Director
