~~Ex~~ Parte No. 690

This is in regarding the nominations for RETAC. I would like to nominate Alan Budleski to the committee. He is a hazardous materials inspector for the FRA out of Chicago. He has been an excellent resource for my plant and myself. I believe he would make an excellent candidate for the committee. He is willing to commit to the term and would bring a wealth of knowledge to this forum.

I would also like to nominate myself. I have been in the ethanol industry for a couple of years and my plant has an excellent shipping record with the UP. If you are seeking ethanol industry professionals for this committee I feel I would be an excellent choice. I have been following this closely and would like the opportunity to contribute to this cause. Thank you for your time.
