Josh,

Just so you know, we've adjusted the APE on the Wells Draw alignment alternative to NOT be on tribal land, as the two images below showed. The corrected alignment is attached. The overlap was caused by the imperfect translation from design files to kmz conversion.

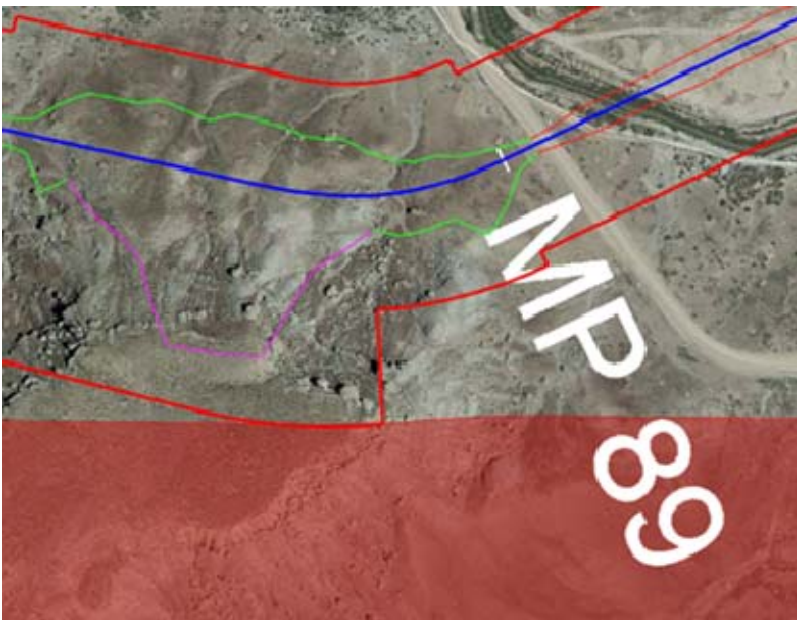

Kevin

Yes, see images below, they were both around Leland Bench.

Thanks Kyle. It was around the Leland bench area, right?

Kevin

Hi Kevin,

We have updated the APE to not show any overlap on tribal lands in the KMZ. There was a bit of overlap due to the imperfect translation from design files to kmz conversion, but it is fixed now in the attached. Since Josh said he handled it on his side, not sure this needs to be transmitted to anyone.
